TO: Bruce Urben-NER RR

FROM: Kevin McKnight-OSH

SUBJECT: Request for State Funded Response Moneys

Map and groundwater sample results are attached.

Background: High levels of chlorinated compounds were found in groundwater samples taken during the Freitag & Sons, Inc. LUST investigation in Nov. 1997. Potential sources for the contamination include the subject site which had a former machine shop (removed >20ys ago) and a former dry cleaner/laundromat directly adjacent to the Freitag & Sons site. Due to the contaminant distribution found in 1997 the Department requested Freitag & Sons to perform additional soil and groundwater sampling to determine if they were the source of the contamination. In Jan. 2001 groundwater sampling showed continued high concentrations of chlorinated compounds including PCE and TCE in the well directly adjacent to the former dry cleaner/laundromat.

The local Masonic Lodge owns the former laundromat/dry cleaner building. The Lodge was contacted and information regarding the past uses of the building requested. According to information the Department received from the Lodge and one former operator of the dry cleaner, the site has had laundry service with dry cleaning off and on from 1959 to around 1989. The laundromat closed in 1996. The latest operator Mr. Lyle Heiling wrote that all the dry cleaning equipment was removed in 1989 and that no spill occurred while he operated the equipment (~1983-1989) and that no chemicals were purchased or disposed of after 1989.

The Department on April 10, 2001 made an onsite inspection of the Lodge property. The Lodge building was built in the early 1900's and consists of a stone foundation with a dirt floor. The building does not have a basement but does have a ~3.5foot crawlspace.

Proposal: I am requesting funds to perform a limited PRP investigation for chlorinated solvents on the Lodge Property. Mr. Don Roidt, the Departments contact at the Lodge, has indicated the Lodge does not have the funds to perform the investigation but would allow the Department access provided they do not get the bill. I have begun discussions with Mark Putra regarding ability to pay.

The proposed investigation would involve two parts, the first would be collection of soil and groundwater samples from the crawl space under the location of the dry cleaning machine. The second part would be geoprobe soil and groundwater sampling on Lodge property upgradient of the former equipment. Total cost of the proposed work is estimated at \$4000-\$6000.
