Jason,

The CC agreed to close the sight, contingent on well abandonment and a completed closure packet. There will probably be some tweaks required after the packet is submitted. One change the CC is requiring is that the Direct contact iso-concentration line on the soil maps has to be moved so as NOT to extend onto the neighbors property (Eisch) to the west (1713).

No I did not know. Should we add these to the updated closure request?

- Check Box xiii. on Table 5 of the Closure Form.
- Figure B.2.a and Figure B.2.b Add Industrial DC Isoconcentration line.
- Table A.2 and A.3 Update RCLs
- Add GW flow direction arrow on B.3.c.

Jason,

Were you aware of these required changes to the Form? I found them on the closure denial form.
