Subject: Site Cleanup Progress: 501 South Park Street

Dear Mr. Herrera:

The Department is seriously concerned about the lack of environmental investigation and cleanup progress at your property on South Park Street. In September 2001 then Department gave approval for your site redevelopment work and placed a requirement on you that you complete, in a timely fashion, a site investigation into the soil and groundwater contamination problems on your site. To date the Department has received no additional information concerning the environmental impacts at the site. Consequently, the Department is considering enforcement action to compel the necessary study. By October 31, 2003 the Department is requiring you to submit a timeline for completing the site investigation tasks outlined in the March 2002 work plan submitted by Resource Engineering Associates. Failure to meet this deadline may force the Department to forward your site to the Wisconsin Department of Justice for legal action to compel the needed work.

If you have questions about this requirement or any other issue please give me a call.

Sincerely,

Michael Schmoller  
Hydrogeologist
