Rob and Kyle,

Thanks for your time today to discuss the October 2018 Site Investigation and Remedial Action Report.

The link to the DOD study on vapor intrusion is included below. The Conceptual Model and Investigation Protocol (links on right) have the gist of it. Flow charts #1 and #3 of the Investigation Protocol summarizes our discussion on the stepped-approach.

<https://www.serdp-estcp.org/Program-Areas/Environmental-Restoration/Contaminated-Groundwater/Emerging-Issues/ER-201505>

The groundwater data I referenced during our call as missing from your groundwater data table is attached. This is an old scan from 2013. There is a significantly better copy in the file. Let me know if you need anything from the file or would like to schedule a time to review it.

Link to DERP: [Dry Cleaner Environmental Response Fund - Wisconsin DNR](#). Please note that the demand for the fund far outweighs the in-coming funding. For your planning purposes, be aware that reimbursement of eligible expenses is currently about five years after receipt of a claim (i.e., after expenses are incurred and a claim drafted). Eligible expenses for this site total \$246,261.26. The amount reimbursed (eligible expenses minus deductible) is \$232,553.82 with a per site max of \$500,000.

I will complete and forward the signed response letter tomorrow. Let me know if you have additional questions.

**We are committed to service excellence.**

Visit our survey at <http://dnr.wi.gov/customersurvey> to evaluate how I did.
