Subject: Closure Denial: Klinkes Cleaners, 412 East Washington Ave, Madison

Dear Mr. Klinke:

On November 20, 2006, the South Central Region Closure Committee reviewed your request for closure of the case described above. The Committee reviews environmental remediation cases for compliance with state rules and statutes to maintain consistency in the closure of these cases. After careful review of your closure request, the Committee has denied closure because additional requirements must be met. The purpose of this letter is to inform you of the remaining requirements for obtaining closure. Your site was denied closure because:

OFF-SOURCE GROUNDWATER CONTAMINATION

Section NR 726.05(2)(b)4, Wis. Adm. Code, requires you to provide written notice of the presence of residual groundwater contamination to the owner of any properties that you do not own if they are affected by groundwater contamination. This same section of the code requires proof that these letters were received at least 30 days prior to the date on which the agency completes its review of the closure report, and that they be included in the GIS Registry attachment to the closure report.

Note: All letters sent to landowners whose property has groundwater contamination exceeding ch. NR 140 enforcement standards at the time case closure is requested must use the template letter found in Appendix A in ch. NR 726.

When all the above requirements have been satisfied, please submit a letter, together with any required documentation, to let me know that applicable requirements have been met. Your site will be listed on the DNR Remediation and Redevelopment GIS Registry of Closed Remediation Sites. Information that was submitted with your closure request application will be included on the GIS Registry. To review the sites on the GIS Registry web page, visit <http://maps.dnr.state.wi.us/brrts>.

If you have any questions regarding this letter, please contact me at 608-275-3303.

Sincerely,

Michael Schmoller
Hydrogeologist
