P.O. Box 49
Cedarburg, WI 53012-0049

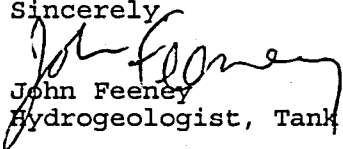

Dear Ms. Vance:

Subject: Cedarburg Light and Water Commission Power Plant, W61 N617
Mequon Avenue

The purpose of this letter is to confirm our agreement that quarterly monitoring for 1996 and annual monitoring thereafter is the plan of action that we agreed to pending the results of 1996 ground water sampling. After the year is over, you and your consultant should re-evaluate the need for active remediation based on the monitoring results. You should be concerned about the solvent contamination in monitoring well MW200, particularly if it seems to be spreading or increasing in concentration. You should also determine the source and extent of the solvent contamination if the levels persist above the enforcement standards in 1996.

If you have any questions about this letter, call me at 414-229-0850.

Sincerely

John Feeney
Hydrogeologist, Tank Response Unit
