As the new property owner, Rosecrans Properties request this meeting to explore any remaining barriers to shutting down the system and transitioning to Monitored Natural Attenuation (MNA) to address the remaining impacts. In support of this transition the previous property owner submitted several reports that support significant reduction of source material (2019-Technical Memorandum Residual Phase LNAPL Investigation), natural attenuation of PCP in site monitoring wells (2020, Technical Memorandum Lines of Evidence of PCP Degradation) and microbial mediated PCP degradation in site groundwater (2022-Technical Memorandum Bio-Trap Study Regarding PCP Degradation). The results of these studies, along with over 30 years of site monitoring data, support the conclusion that operation of the pump and treat system is no longer necessary.

Rosecrans Properties is seeking clarification and understanding of what, if any, additional data or data evaluation, would be included with a formal request to shut down the system and move the site into an MNA program.
