Subject: Holtz & Krause 02-37-000007 Annual OM&M report concurrence
Attachments: 0674 points listing.pdf

Hi Tom,

Per our recent conversation I concur with your recommendation to modify the monitoring schedule as proposed in Section 5 of the Annual Operation, Maintenance, and Monitoring Report January 2022 through December 2022. In the future please ensure that you have documented concurrence from the DNR prior to implementing any changes to you sampling schedule. I have attached a list of monitoring points currently listed in GEMS to assist in the process of submitting the missing historical data to GEMS. Please let us know if you have any question.

Thanks,

Pete Raymond
