Hey Denice,

EPA approves the 90-day extension request for the 5-Year Technical Review with the new due date, as stated below, being April 1, 2024.

Thank you!

Andrew Kleinberg

Subject: Five-Year Technical Review Report: 90-Day Extension Request- Tyco Fire Products LP Stanton Street Property, Marinette, WI

Caution: This email originated from outside EPA, please exercise additional caution when deciding whether to open attachments or click on provided links.

Hi Andrew,

In our December 7, 2023 monthly meeting on the Tyco Fire Products LP (Tyco) Stanton Street site in Marinette, WI, the U.S. Environmental Protection Agency (EPA) indicated that comments on the 2022 *Barrier Wall Groundwater Monitoring Annual Report* (submitted April 15, 2023) are forthcoming and will be provided to Tyco sometime in January 2024. EPA also indicated during the call that these forthcoming comments should be addressed in the 2023 barrier wall groundwater monitoring annual report.

As discussed with EPA at a prior monthly meeting, the 2023 barrier wall groundwater monitoring annual report components are being incorporated into the 2023 five-year technical review report to streamline the report preparation and review process.

Under the 2009 Administrative Order on Consent (AOC) between Tyco and EPA, the 2023 five-year technical review report is due by December 31, 2023 (see Paragraph 11.g). In order to allow for the incorporation of the agency's forthcoming comments, and as authorized under Paragraphs 22 and 34 of the AOC, Tyco requests a 90-day extension to the submittal deadline for the 2023 five-year technical review report, to April 1, 2024. The requested extension will not impact the schedule for completion of other site activities.

Please let me know if you have any questions or require additional information.

Sincerely,

Denice Nelson
