Subject: Ammendment to May 22, 2019 Infiltration/Injection Approval
Appleton Wire (former), 908 N. Lawe Street, Appleton, WI
WDNR BRRTS Activity # 02-45-000015
FIN# 61613

Dear Mr. Gaug:

On July 29, 2019, the Department of Natural Resources (DNR) received a request to revise the May 22, 2019 Infiltration/Injection approval. This request dated July 24, 2019, from your consultant EnviroForensics, LLC requests permission to use alternative remedial amendments due to a change in subcontractors. The changes are:

- 3-D Microemulsion (3DME®) will replace Anaerobic BioChem (ABC®);
- Sulfidated Zero-Valent Iron (S-Micro ZVI), which is a colloidal ZVI product, will replace a powder-based ZVI solution.

The DNR approves these changes to the May 22, 2019 Infiltration/Injection approval provided the work is performed according to the submitted request and the conditions of the previous approval.

If you have questions regarding this letter please contact me at 920-424-7890 or by email at kevin.mcknight@wisconsin.gov.

Sincerely,

Kevin D. McKnight
