Hi OJ,

Great news! Let us know if Rexnord has any questions for us specifically regarding the occurrence or next steps. I'll let the State and county health departments know that there is no longer an immediate exposure scenario.

Best,
Jeff Dewey

Good afternoon-

We have received the March VI data and I wanted to send a quick email out regarding the indoor air sample from IA/SS-02 as you know we had TCE detected in the indoor air at a concentration of 214 µg/m3 in February. I'm happy to report that the concentration has decreased to the range we had seen at this location. The March result is to 3.74 µg/m3.

We will prepare a summary with the other results from this sampling event and will have something to you this week.

IA-02 (middle side Building B)	9/14/2023	ug/m3	2.74	1.03 U	0.808 U	1.54 U	1.16 U
	2/12/2024	ug/m3	214	1.03 U	0.808 U	0.794 J	1.16 U
	3/27/2024	ug/m3	3.74	1.03 U	0.808 U	1.54 U	1.16 U

I will let Rexnord know about these results as well.

Thanks-

Daniel (OJ) Ojinaga
Project Manager/Engineer
