Subject: Milwaukee Die Casting Co. Inc. site (BRRTS #02-41-000023)

Good afternoon Greg-

This morning (on my day off), I brought Pharmacia's site investigation work plan (SIWP) modification request to drop sampling and analysis of SVOCs and PCBs from the second round of groundwater monitoring of the 17 new monitoring wells at the Milwaukee Die Casting site to an ad hoc technical review group comprised of one team supervisor, a hydrogeologist program coordinator, two program hydrogeologists (who review the NAR [no action required] submittals for our region), and myself. I presented the pre-EPA Removal Action SVOCs (Braun, 2004) and PCBs (Arcadis, multiple years, & U.S.EPA, 2011) data; your recent well installation, development, and sampling experiences; and the post-Removal Action SVOCs and PCBs results (Geosyntec, 2020). These four colleagues participate in case closure committee and peer review meetings routinely (monthly, weekly); whereas, I do not because of my site assessment responsibilities.

It was decided that you should complete the SIWP approved on Dec. 19, 2019, that it is better that your client proceeds at this time with the second round of sampling to confirm that SVOCs and PCBs are not or are no longer groundwater contaminants of concern.

Thank you,
Steve

We are committed to service excellence.
