Yes, They fixed MW-8 by installing a new J-Plug, new gasket on cover, new cover with new bolts. MW-8A, was slightly raised, so they pulled the cover, cleaned out the build up around the well and put the cover back on so it sits flush.

Nick,

Do you know if your staff member was able to locate the missing flush mount at 300 S Sixth St or did they put a new one on? Were there any other issues with the well they noted? Thank you,
