

Phone Log

January 15, 2016

Site Name: Appleton City (Coal Tar) (MGP)
Site ID: 02-45-000042

Name: Frank Dombrowski, We Energies
Phone:
Initiated By: Borski
Time: 1:10 PM

Borski left a voice mail message for Dombrowski in the morning and Dombrowski returned the call in the afternoon. Borski communicated the result of the discussion with Alyssa Sellwood and Terry Evanson of DNR on 01/14/2016 that high-purge volume (HPV) sampling from SS-1 & SS-5 with communication testing limited to within the parking garage is an appropriate investigation. Dombrowski understands that if HPV results indicate the potential for intrusion into indoor air from the subsurface that additional investigation and/or mitigation may be necessary.

Dombrowski will communicate this to Natural Resources Technology and submit a revised SVI proposal for review and response.

Notes prepared by Jennifer Borski, WDNR
