Good Evening Frank,

In the 2020-2021 Annual Report, WPS requested a response to a 2016 request for assistance submitted with fee regarding the vapor intrusion assessment completed at the Fox River Mills property adjacent to the former Appleton MGP site.

Based on review of the June 6, 2016 technical memorandum on the vapor intrusion (VI) assessment completed at the Fox River Mills property adjacent to the former Appleton MGP site, DNR concurs that the VI pathway has been assessed and no additional investigation is necessary at this time.

Please reach out with any questions or concerns.

Thank you,  
Sarah
