John: Good afternoon, the attached table has the Minocqua Cleaners monitoring results through the Round 4 of the current contract which was performed on Oct 25 and 26, 2021. I reviewed and looking pretty good, with the exception of pumping well EXW-4 that had a PAL detect, all the monitoring wells on Pine St and in the west part of the site ((B-3, B-8, B-1) were no detect suggesting plume continues to contract. Muni #4 is ND since our sampling of it started in Oct 2020. I'm working on the EXW-4 letter report and hope to send that to you by the end of the year, then we'll send a more complete status report in the late winter. Let me know if you have questions. Thanks. Dick Lyster, MSA
