Subject: Consultant Qualification Criteria
C.M. Christiansen Site

I believe the following criteria should be considered for final selection of an environmental consultant for the C.M. Christiansen Site.

2. Qualification of Project Consulting Firm.
 1. Firm has experience with investigation of PCP.
 2. Firm has experience with remediation of PCP.
 3. Firm has access to, and experience with, a portable GC and/or immuno assay testing, or other field analysis.
 4. Firm can demonstrate an established project team approach, to cost effectively manage a complex technical site investigation and clean-up. Firm can demonstrate, prudent use of field technicians, administrative staff, scientists and senior scientist, on previous projects.
 5. Firm can demonstrate their ability to work within the Department's invoicing process.

1. Qualification of Project Personnel
 - a. Project personnel have experience with PCP soil and groundwater investigation in the State of Wisconsin.
 - b. Project senior scientist, hydrogeologist, and engineer have experience with PCP soil and groundwater remediation in the State of Wisconsin.
 - c. Project senior scientist, hydrogeologist, and engineer have prior experience with the implementation of more than one PCP treatment alternative for both soil and groundwater.
 - d. Field technicians have experience with soil and groundwater sampling for PCP.
