SUBJECT: C.M. Christiansen Request for proposal

FILE REF: ERRP

A responsible party has recently come forward to respond the contamination event at the C.M. Christiansen site. He has indicated that he will begin a remedial investigation by April 15, 1995. In light of this new information I believe that we should no longer pursue a State Lead project.

In the case that the responsible party does not complete an environmental investigation and remediation, I believe our best course of action is to request EPA Emergency Removal Program to initiate an emergency remedial action.

Therefore, North Central District is retracting our request for Environmental Funds for the C.M. Christiansen project.

I have greatly appreciated all your help on this case and will keep you posted on the cases progress.

Should you have any questions please feel free to contact me.

Again, thanks.
