Subject: Christiansen Site Bio-Treatability Samples

Dear Mr. Gregory:

The purpose of this letter is to confirm our recent conversation concerning the bio-treatability samples being proposed for collection at the C. M. Christiansen Site.

The Department agrees that materials collected from the C.M. Christiansen, site for the purpose of bio-treatability tests, will be considered samples during transport from the site to the laboratory and from the laboratory back to the site. Sample materials will be re-incorporated in the parent material from site.

I hope that this letter has helped to address your concerns.

Sincerely,

M. Scott Watson
Environmental Repair Coordinator
