Dear Scott,

For the North and South Twin Lakes Riparian Association, I wish to thank you and your associates for your participation in the Public Information meeting conducted Tuesday evening, July 9 in Phelps.

The presentations were indeed informative and, I believe, well received by those participants in the meeting who came to hear the facts about the Military Creek environmental investigation and pollution question. The approach taken to inform the public about matters such as this can only enhance the reputation of the DNR and their positive manner of solving this type problem.

I am looking forward to receiving a summary of the meeting from you which I intend to include in the NSTLRA August Newsletter to inform those of our membership who could not be present.

I anticipate our continued cooperation in this matter.

Sincerely,

Jerry Parker  
President
