One additional note I failed to mention in my email to you. If PFAS is detected above the proposed regulatory limits, per Wis. Admin. Code [NR 706.05\(1\)\(a\)](#), we should be notified “immediately”. By practice we’d expect that to be within a few days of the consultant receiving the laboratory report. Typically TRC takes several months to reports results (which is acceptable) but in the case of a new class of compounds, we’d expect to closely follow the statute.

Any questions, let me know.

Demaree,

On August 11, 2021, the WDNR PFAS committee approved (with no comments) the work plan submitted by TRC for the Lemberger Superfund sites. TRC submitted the plan on July 9, 2021, which calls for four total groundwater samples covering both sites. The plan is compliant with current State of Wisconsin PFAS guidance, the required PFAS compounds, methods, and an approved laboratory. We view this as an initial plan, which may lead us to more sampling if PFAS is detected.

If you have any questions, please let me know.

BJ
