Ms. Demaree Collier
Remedial Project Manager
USEPA Region 5
77 West Jackson Boulevard
Chicago, IL 60604

Subject: Transmittal of Data
Residential, Plume Monitoring, and Sentinel Wells
Lemberger Landfill Sites
Third Quarter 2022

Dear Ms. Collier:

On behalf of the Lemberger Site Remediation Group (LSRG), and in accordance with the Environmental Monitoring Plan (EMP), Revision 5 (February 2021), and the subsequent monitoring program revisions as approved by the United States Environmental Protection Agency (USEPA) and the Wisconsin Department of Natural Resources (WDNR), TRC Environmental Corporation (TRC) is submitting the following data:

- Attachment 1: Data Validation Comments and Qualified Form 1s For All Wells
- Attachment 2: Table of Wisconsin Administrative Code Chapter NR 140 Groundwater Quality Standards (Enforcement Standards [ESs], Preventive Action Limits [PALs], Maximum Contaminant Levels [MCLs], and Secondary Maximum Contaminant Levels [SMCLs]) for the Pertinent Parameters
- Attachment 3: Tabular Summary of Analytical Results at Each Residential Well
- Attachment 4: Original Laboratory Data Sheets for Residential Wells
- Attachment 5: Residential Well Location Map with Owner/Occupant Addresses
- Attachment 6: Tabular Summary of Analytical Results at Each Monitoring Well
- Attachment 7: Laboratory Data Qualifiers for Monitoring Wells
- Attachment 8: Tabular Summary of Groundwater Standard Exceedances at Plume Monitoring Wells

A CD containing field and laboratory data in an approved WDNR format has been attached to the copies provided to the WDNR and the USEPA, for their use. Groundwater samples were collected during September and October 2022, in accordance with the February 2021 EMP, Revision 5.

All of but one the residential wells specified in the third quarter monitoring program were sampled during this event. Residential well GR-13 was not sampled due to an inoperable pump. No groundwater quality standard exceedances were found among the residential wells sampled during this quarter.

The residential well volatile organic compound (VOC) samples were collected without a hydrochloric acid (HCl) preservative. We are collecting unpreserved samples due to ongoing problems with false-positive chloromethane detections sourced to the HCl preservative. The laboratory analyzed the

Ms. Demaree Collier
USEPA Region 5
May 25, 2023
Page 2

samples within 7 days of collection, which is consistent with an older approved VOC sampling methodology.

Please call if you have questions.

Sincerely,

TRC

Kristopher D. Krause, P.E.
Senior Project Manager

Data Validation Comments and Qualified Form 1s For All Wells

Memorandum

To: Meredith Westover

From: Jeanette Daniels (Data Reviewer)
Elizabeth Denly (Peer Reviewer)

Date: January 24, 2023

Subject: Data Validation Report
Groundwater Samples: 3rd Quarter 2022
Lemberger Landfill and Lemberger Transport and Recycling/Franklin, Wisconsin
Laboratory Project Numbers 40253296, 40253891, 40253980

SUMMARY

Limited validation (level III) was performed on the data for 20 groundwater samples, one field duplicate, two field blanks, and three trip blanks collected at the Lemberger Landfill and Lemberger Transport and Recycling Site in Franklin, Wisconsin. The samples were collected on October 13, 14, 26, 27, and 28, 2022. Samples were submitted to Pace Analytical Services, LLC in Green Bay, Wisconsin for analysis. The samples were analyzed for volatile organic compounds (VOCs) using SW-846 method 8260. The laboratory reported the results under laboratory project numbers 40253296, 40253891, and 40253980.

The sample results were assessed using the *USEPA National Functional Guidelines for Organic Superfund Methods Data Review* (EPA-540-R-20-005), November 2020 and the project-specific quality assurance project plan (QAPP), dated September 2011, Revision 1.

In general, the data are valid as reported and may be used for decision-making purposes. The following issues were noted which may have a minor impact on the data usability:

- Select results were reported which were below the lowest calibration standard and quantitation limit (QL); these results were qualified by the laboratory as estimated (J)
- Potential uncertainty exists for the nondetect results for select VOCs in all samples due to continuing calibration nonconformances. These results were qualified as estimated (UJ).
- Potential low bias exists for the nondetect result for vinyl chloride in sample RM-007XXD due to low recovery in the matrix spike duplicate. This result was qualified as estimated (UJ).
- Potential high bias exists for the positive results for 1,1-dichloroethane in samples RM-214D, RM-213XD, RM-306D, and RM-307D due to a high LCS recovery. These results were qualified as estimated (J+) with a potential high bias.

SAMPLES

Samples included in this review are listed below.

Laboratory Project Number 40253296: plume wells collected 10/13/22 and 10/14/22

- RM-404XXD
- RM-101D
- RM-204D
- TB-001
- RM-212D

Laboratory Project Number 40253891: plume wells collected 10/26/22

- RM-402XD
- RM-008D
- TB-001
- RM-102D
- RM-402XXD
- RM-203D
- FB-003

Laboratory Project Number 40253980: plume wells collected 10/27/22 and 10/28/22

- OW-104F
- RM-007XD
- RM-303D
- RM-214D
- RM-306D
- RM-007D
- FB-002
- RM-007XXD
- RM-213XD
- RM-307D
- FDUP-002¹
- RM-005D
- TB-001
- RM-213D

¹ FDUP-002: Field duplicate of RM-007XD

REVIEW ELEMENTS

Sample data were reviewed for the following parameters:

- Agreement of analyses conducted with chain-of-custody (COC) requests
- Data completeness
- Holding times and sample preservation
- Gas chromatography/mass spectrometry (GC/MS) tunes
- Initial and continuing calibrations
- Blanks
- Surrogate spike recoveries
- Matrix spike/matrix spike duplicate (MS/MSD) results
- Laboratory control sample (LCS) results
- Internal standard performance
- Field duplicate results
- Quantitation limits and sample results

DISCUSSION

Agreement of Analyses Conducted with Chain-of-Custody Requests

Sample reports were checked to verify that the results corresponded to analytical requests as designated on the COCs. No issues were noted.

Data Completeness

The data packages were found to be complete as received from the laboratory with the following exception.

- The laboratory only spiked a subset of the VOCs which were reported in the samples in the LCS and MS/MSD analyses. Thus, accuracy and/or precision could not be evaluated for select VOCs.

No validation actions were taken on the basis of this issue.

Holding Times and Sample Preservation

All holding time and sample preservation criteria were met. However, the cooler temperature was -0.5°C in laboratory project number 40253296. Since the associated samples were not frozen, there was no adverse impact on the data; qualification of the data was therefore not required.

Samples were received by the laboratory between two to five days after collection. Samples were stored in coolers, on ice, in a locked former treatment building at the site until delivery to the laboratory. No validation actions were required on this basis since the samples were kept on ice prior to delivery to the laboratory and were received on ice and at acceptable cooler temperatures by the laboratory.

GC/MS Tunes

The frequency and abundance of all bromofluorobenzene tunes were within the acceptance criteria.

Initial and Continuing Calibrations

The coefficients of determination, percent relative standard deviations, and relative response factors (RRFs) for all target compounds were within the laboratory acceptance criteria in the initial calibrations.

All RRFs were within the acceptance criteria in the continuing calibrations (CCs). The following table summarizes the percent differences or percent drifts (%Ds) which were outside of the laboratory acceptance criteria in the CCs, the associated samples, and the resulting validation actions.

CC	Analyte	%D	Associated Samples	Validation Actions
40MSVC 10/21/22 @ 07:08	Bromomethane	-33.0480	RM-212D, RM-404XXD, RM-204D, RM-101D, TB-001 (10/14/22)	The nondetect results for the listed VOC were qualified as estimated (UJ) in the associated samples.
40MSVB 10/31/22 @07:21	Chloromethane	-22.3424	RM-008D, RM-402XXD, RM-402XXD, RM-203D, RM-102D, FB-003, TB-001 (10/26/22), RM-005D, OW-104F	The nondetect results for the listed VOC were qualified as estimated (UJ) in the associated samples.
40MSVA 11/03/22 @07:04	Chloroethane	23.3286	RM-214D, RM-213XXD, RM-306D, RM-307D, RM-213D	The nondetect results for the listed VOCs were qualified as estimated (UJ) in the associated samples.
	4-Methyl-2-pentanone (MIBK)	20.7922		

Memorandum
January 24, 2023
Page 4 of 6

CC	Analyte	%D	Associated Samples	Validation Actions
40MSVB 11/04/22 @07:01	Carbon disulfide	-20.7657	RM-007XXD, RM-007XD, FB-002, RM-303D, RM- 007D, FDUP-002, TB-001 (10/28/22)	The nondetect results for the listed VOC were qualified as estimated (UJ) in the associated samples.

Blanks

Target analytes were not detected in the laboratory method blanks or trip blanks for VOCs. The following table summarizes the compounds that were detected in the field blanks, the associated samples, and the resulting validation actions.

Analyte	Blank Concentration ($\mu\text{g/L}$)	QL ($\mu\text{g/L}$)	Blank ID: Associated Samples	Validation Actions
Toluene	1.0	1.0	FB-002 (10/28/22): RM-005D, RM-303D, RM- 007D, RM-007XXD, RM- 007XD, FDUP-002, RM-214D, RM-213XD, RM- 213D RM-306D, RM-307D, OW- 104F	Qualification was not required since toluene was not detected in the associated samples
Toluene	0.95 J	1.0	FB-003 (10/26/22): RM-008D, RM-402XD RM-402XXD, RM-203D RM-102D	Qualification was not required since toluene was not detected in the associated samples.

Surrogate Spike Recoveries

The percent recoveries (%Rs) of the surrogates were within the laboratory acceptance criteria for all samples.

MS/MSD Results

MS/MSD analyses were performed on samples RM-212D, RM-007XXD, RM-213D and RM-005D. All relative percent differences (RPDs) were within the acceptance criteria. The MS/MSD %Rs were within the acceptance criteria except as shown in the table below.

MS/MSD Sample ID	Analyte	MS %R	MSD %R	QC Limits %R	Validation Action
RM-007XXD	Vinyl chloride	Criteria Met	58	60-137	The nondetect result for vinyl chloride in sample RM-007XXD was qualified as estimate (UJ).
RM-213D	1,1-Dichloroethene	137	131	71-130	No qualification was required since the listed analytes were nondetect in the associated sample.
	Carbon disulfide	133	Criteria Met	70-130	

Note that the laboratory only spiked a subset of the VOCs which were reported in the samples in the MS/MSDs. Thus, accuracy and precision could not be evaluated for the following VOCs (which were

not spiked) in the MS/MSD analyses: 2-butanone, 2-hexanone, 4-methyl-2-pentanone, and acetone. No validation action was taken on this basis.

LCS Results

An LCS was performed each day prior to sample analysis. All LCS %Rs for the VOCs were within the laboratory's acceptance criteria except as shown in the table below.

Analyte	LCS %R	QC Limits %R	QC Batch: Associated Sample(s)	Validation Action
1,1-Dichloroethane	134	70-130	2478447: RM-213D, RM-214D, RM-213XD, RM-306D, RM-307D	The positive results for 1,1-dichloroethane in samples RM-214D, RM-213XD, RM-306D, and RM-307D were qualified estimated with a potential high bias (J+).
1,2-Dichloropropane	122	80-121		No qualification was required for 1,2-dichloropropane in all associated samples and 1,1-dichloroethane in sample RM-213D since these compounds were not detected in these samples.

Note that the laboratory only spiked a subset of the VOCs that were reported in the samples in the LCS. Thus, accuracy could not be evaluated for the following VOCs (which were not spiked) in all LCSs: 2-butanone, 2-hexanone, 4-methyl-2-pentanone, and acetone. No validation action was taken on this basis.

Internal Standard Performance

Internal standards were within the method acceptance criteria in all sample analyses.

Field Duplicate Results

The samples listed below were submitted as the field duplicate pair with this data set.

- RM-007XD and FDUP-002

The following table summarizes the RPDs or absolute differences (AbsDs) of the detected results in the field duplicate pair. All criteria were met.

Analyte	QL (mg/L)	RM-007XD (mg/L)	FDUP-002 (mg/L)	RPD (%) or AbsD (mg/L)	Validation Action
1,1,1-Trichloroethane	1.0/2.5	223	206	RPD = 7.9	None; all criteria were met (see criteria, below)
1,1-Dichloroethane	1.0/2.5	173	170	RPD = 1.8	
1,1-Dichloroethene	1.0/2.5	29.6	23.3	RPD = 24	
Tetrachloroethene	1.0/2.5	2.3	1.8 J	AbsD = 0.5	
Trichloroethene	1.0/2.5	44.0	39.3	RPD = 11	
cis-1,2-Dichloroethene	1.0/2.5	74.8	69.5	RPD = 7.4	
trans-1,2-Dichloroethene	1.0/2.5	< 1.0	1.4 J	AbsD = 0.4	

Criteria:

- When both results are > 5x the QL, RPDs must be ≤ 30%.
- When one or both results are < 5x the QL, AbsD must be < the QL.

Quantitation Limits and Sample Results

The following table summarizes the dilutions performed on the samples in this data set; QLs were elevated accordingly by the laboratory.

Sample ID	Parameter	Dilution	Reason for Dilution
RM-303D	VOCs	2.5-fold	Dilutions were performed due to the concentrations of target analytes which would have exceeded the calibration range if analyzed undiluted.
RM-007D	VOCs	2.5-fold	
FDUP-002	VOCs	2.5-fold	

Select results were reported which were below the lowest calibration standard level and QL (or limit of quantitation [LOQ]). These results were qualified as estimated (J) by the laboratory.

The laboratory's LOD for select VOCs was above one or both of the project action limits specified in the QAPP; the affected VOCs, project action limits, and current laboratory LODs are summarized in the table below.

Analyte	Affected Samples	WAC Chapter NR 140 PAL ($\mu\text{g}/\text{L}$)	WAC Chapter NR 140 ES ($\mu\text{g}/\text{L}$)	Laboratory LOD ($\mu\text{g}/\text{L}$)
1,1,2,2-Tetrachloroethane	All samples in this sample set, except for RM-007D, FDUP-002 and RM-303D	0.02	0.2	0.38

Memorandum

To: Meredith Westover

From: Jeanette Daniels (Data Reviewer)
Elizabeth Denly and Kristen Morin (Peer Reviewer)

Date: January 26, 2023

Subject: Data Validation Report
Groundwater Samples: 3rd Quarter 2022
Lemberger Landfill and Lemberger Transport and Recycling/Franklin, Wisconsin
Laboratory Project Numbers (All Revised 1/25/23) 40252499, 40253296, 40253891,
40253980

SUMMARY

Limited validation (level III) was performed on the data for 12 groundwater samples, two field duplicates, and two field blanks collected at the Lemberger Landfill and Lemberger Transport and Recycling Site in Franklin, Wisconsin. The samples were collected on September 29 and 30, and October 13, 14, 26, and 28, 2022. Samples were submitted to Pace Analytical Services, LLC in Green Bay, Wisconsin for analysis. The samples were analyzed for one or more of the following parameters:

- Total iron and manganese using SW-846 Method 6020B
- Chloride and sulfate using EPA Method 300.0
- Alkalinity using EPA Method 310.2
- Nitrogen/nitrate + nitrite using EPA Method 353.2
- Total organic carbon (TOC) using Standard Methods 5310C

The laboratory reported the results under laboratory project numbers 40252499 (revised 1/25/23), 40253296 (revised 1/25/23), 40253891 (revised 1/25/23), and 40253980 (revised 1/25/23).

The sample results were assessed using the *USEPA National Functional Guidelines for Inorganic Superfund Methods Data Review* (EPA-542-R-20-006), November 2020 and the project-specific quality assurance project plan (QAPP), dated September 2011, Revision 1.

In general, the data are valid as reported and may be used for decision-making purposes. The following issues were noted which may have a minor impact on the data usability:

- Select metals and TOC results were reported which were below the lowest calibration standard and quantitation limit (QL); these results were qualified by the laboratory as estimated (J).
- Potential high bias exists for the positive result for manganese in sample RM-404XXD due to calibration blank contamination; this result was qualified as estimated (J+) with a potential high bias.
- The positive result for manganese in sample RM-204D was qualified as estimated nondetect (UJ) at the reported concentration due to calibration blank contamination.

- Potential high bias exists for the positive results for TOC in all groundwater samples in this data set due to field blank contamination. These results were qualified as estimated (J+) with a potential high bias.
- Potential high bias exists for the positive results for alkalinity in all groundwater samples in this data set due to high recoveries in the MS and/or MSD analyses. These results were qualified as estimated (J+) with a potential high bias.
- Potential high bias exists for the positive results for chloride and sulfate in all groundwater samples in data set 40252499 except RM-401XXD due to high recoveries in the MS and MSD analyses. These results were qualified as estimated (J+) with a potential high bias.

SAMPLES

Samples included in this review are listed below.

Laboratory Project Number 40252499: sentinel wells collected 9/29 – 9/30/22

- RM-401XXD
- RM-003XXD
- RM-002D
- FB-001
- RM-210D
- FDUP-001¹

Laboratory Project Number 40253296: plume wells collected 10/13/22 and 10/14/22

- RM-404XXD
- RM-204D

Laboratory Project Number 40253891: plume wells collected 10/26/22

- RM-402XD
- RM-102D
- RM-203D

Laboratory Project Number 40253980: plume wells collected 10/28/22

- OW-104F
- RM-007XD
- RM-007D
- FB-002
- FDUP-002²

¹ FDUP-001: Field duplicate of RM-003XXD

² FDUP-002: Field duplicate of RM-007XD

REVIEW ELEMENTS

Sample data were reviewed for the following parameters:

- Agreement of analyses conducted with chain-of-custody (COC) requests
- Data completeness
- Holding times and sample preservation
- Inductively coupled plasma-mass spectrometry (ICP-MS) tune results (Metals only)
- Initial and continuing calibrations
- Interference check sample (ICS) results (Metals only)
- Blanks
- Matrix spike/matrix spike duplicate (MS/MSD) results
- Laboratory control sample (LCS) results
- Internal standard performance (Metals only)

- Serial dilution results (Metals only)
- Laboratory duplicate results
- Field duplicate results
- Quantitation limits and sample results

DISCUSSION

Agreement of Analyses Conducted with Chain-of-Custody Requests

Sample reports were checked to verify that the results corresponded to analytical requests as designated on the COCs. No issues were noted.

The laboratory noted that sample RM-007XD in report 40253980 had no ID or date on the TOC bottle. No validation action was required.

Data Completeness

The data packages were found to be complete as received from the laboratory with the following exception. A discrepancy was noted with the reported QLs on the calibration blank forms for sulfate and TOC in all laboratory reports; the laboratory was contacted about this issue during validation and provided revised reports to correct this issue.

Holding Times and Sample Preservation

All samples were analyzed within the method-specified holding time. All samples were received by the laboratory on ice and at the proper temperature. The cooler temperature was noted by lab as being -0.5°C in report 40253296.

Samples were received by the laboratory between two to five days after collection. Samples were stored in coolers, on ice, in a locked former treatment building at the site until delivery to the laboratory. No validation actions were required on this basis since the samples were kept on ice prior to delivery to the laboratory and were received on ice and at acceptable cooler temperatures by the laboratory.

The laboratory noted that sample RM-204D in report number 40253296 and sample RM-402XD in report number 40253891 were received partially frozen. No validation action was required on this basis.

ICP-MS Tune Results (Metals only)

The resolution of the mass calibration was within 0.1 atomic mass units (amu) over the range of 7 to 208 amu. The percent relative standard deviations (%RSDs) for all analytes in the tuning solution met the acceptance criteria of <5%.

Initial and Continuing Calibrations

Metals

Initial calibration correlation coefficients provided in laboratory reports 40252499 and 40253891 met criteria; laboratory reports 40253296 and 40253980 did not include the initial calibration data, but criteria were met based on the case narrative. The initial calibration verification (ICV) and continuing

calibration verification (CCV) percent recoveries (%Rs) met the method acceptance limits. The low-level check standard %Rs were within 70-130%.

Chloride, Sulfate, Alkalinity, Nitrogen/Nitrate + Nitrite, TOC

Initial calibration correlation coefficients provided in laboratory reports 40252499 and 40253891 met criteria; laboratory reports 40253296 and 40253980 did not include the initial calibration data, but criteria were met based on the case narrative.

The ICV and CCV %Rs met the method acceptance limits. The low-level check standard %Rs were within 60-140%.

ICS Results (Metals only)

The ICS analyses %Rs for iron and manganese were within the 80-120% acceptance criteria. The ICSA results were not evaluated since the interferent, iron, was not detected in the samples at concentrations comparable to the ICS solutions.

Blanks

Metals

Target analytes were not detected in the associated field blanks and method blanks. Manganese (2.8 µg/L) was detected in the calibration blank associated with samples RM-204D and RM-404XXD. The positive result for manganese in sample RM-404XXD was qualified as estimated (J+) with a potential high bias. The positive result for manganese in sample RM-204D was qualified as estimated nondetect (UJ) at the reported concentration since the result was < QL.

Alkalinity, Nitrogen/Nitrate + Nitrite, Chloride, Sulfate

Target analytes were not detected in the associated calibration blanks, field blanks, and method blanks.

The laboratory's instrument detection limits (IDLs), which were used to evaluate calibration blanks, were set to the QLs and were approximately 3.4×, 4.6×, 4.5×, and 4.2× higher than the sample limits of detection (LODs) (or method detection limits [MDLs]) for alkalinity, chloride, sulfate, and nitrate + nitrite, respectively, in all sample sets. Thus, calibration blanks were only evaluated to the IDLs (or QLs) while samples and associated method blanks were evaluated to the MDLs for these parameters.

TOC

Target analytes were not detected in the associated calibration blanks and method blanks.

The laboratory's IDL, which was used to evaluate calibration blanks, was set to the QL and was approximately 3.6× higher than the sample LOD (or MDL) for TOC in all sample sets. Thus, calibration blanks were only evaluated to the IDL (or QL) while samples and associated method blanks were evaluated to the MDL for TOC.

TOC was detected in both field blanks associated with the samples in this data set at the listed concentrations: FB-001 (0.40 µg/L) and FB-002 (0.29 µg/L). The results for TOC in all groundwater

samples in this data set were <10× the field blank concentrations; thus, the positive results for TOC in all groundwater samples in this data set were qualified as estimated (J+) with a potential high bias.

MS/MSD Results

MS/MSD analyses were performed on the following samples for the indicated parameters:

- Laboratory project number 40253296: RM-204D for alkalinity
- Laboratory project number 40253980: OW-104F and RM-007D for TOC, OW-104F for chloride and sulfate
- Laboratory project number 40252499: RM-401XXD* for metals, chloride, sulfate, alkalinity, nitrogen/nitrate + nitrite, and TOC
- Laboratory project number 40253891: RM-203D for alkalinity, RM-402XD* for metals and nitrogen/nitrate + nitrite

*A post digestion spike was also performed on this sample for metals.

The following table summarizes the %Rs that were outside of the laboratory's acceptance criteria in the MS/MSD analyses and the validation actions; all relative percent difference (RPD) criteria were met.

MS/MSD Sample ID	Analyte	MS %R	MSD %R	QC Limits %R	Validation Action
RM-204D	Alkalinity	Met criteria	113	90-110	The positive results for alkalinity in all groundwater samples in this data set were qualified as estimated (J+) with a potential high bias.
RM-401XXD	Alkalinity	112	Met criteria	90-110	
RM-203D	Alkalinity	Met criteria	112	90-110	
Associated samples: All groundwater samples in this data set					
OW-104F	Chloride	115	115	90-110	The positive results for chloride and sulfate in all groundwater samples in data set except RM-401XXD were qualified as estimated (J+) with a potential high bias.
	Sulfate	118	118	90-110	
Associated samples: All groundwater samples in data set except RM-401XXD					

LCS Results

The LCS %Rs were within the laboratory acceptance criteria for metals, alkalinity, nitrogen/nitrate + nitrite, chloride, sulfate, and TOC analyses.

Internal Standard Performance (Metals only)

Internal standards were within the method acceptance criteria in all sample analyses.

Serial Dilution Results (Metals only)

Serial dilution analyses for the metals analyses were performed on samples RM-003XXD and RM-203D; all criteria were met.

Laboratory Duplicate Results

Laboratory duplicates were not performed on samples from these data sets.

Field Duplicate Results

The samples listed below were submitted as the field duplicate pairs with this data set.

- RM-007XD and FDUP-002 (laboratory project number 40253980)
- RM-003XXD and FDUP-001 (laboratory project number 40252499)

The following tables summarize the RPDs or absolute differences (AbsDs) of the detected results in the field duplicate pairs. All criteria were met.

Analyte	QL (mg/L)	RM-007XD (mg/L)	FDUP-002 (mg/L)	RPD (%) or AbsD (mg/L)	Validation Action
Chloride	2.0	8.8	8.8	AbsD = 0.0	None; all criteria were met (see criteria, below)
Sulfate	10.0	128	130	RPD = 1.6	
Alkalinity	25.0	455	455	RPD = 0.0	
Nitrogen/nitrate + nitrite	0.25	1.4	1.3	RPD = 7.4	
TOC	0.50	1.5	1.4	AbsD = 0.1	

Analyte	QL (mg/L)	RM-003XXD (mg/L)	FDUP-001 (mg/L)	RPD (%) or AbsD (mg/L)	Validation Action
Chloride	2.0	29.3	29.6	RPD = 1.0	None; all criteria were met (see criteria, below)
Sulfate	2.0	28.3	28.3	RPD = 0.0	
Alkalinity	25.0	351	360	RPD = 2.5	
Nitrogen/nitrate + nitrite	0.25	6.0	6.1	RPD = 1.7	
TOC	0.5	1.2	1.3	AbsD = 0.1	

Criteria:

- When both results are $> 5x$ the QL, RPDs must be $\leq 35\%$.
- When one or both results are $< 5x$ the QL, AbsD must be $<$ the QL.

Quantitation Limits and Sample Results

The following table summarizes the dilutions performed on the samples in this data set; QLs were elevated accordingly by the laboratory.

Sample ID	Parameter	Dilution	Reason for Dilution
RM-204D	Alkalinity	2-fold	Dilutions were performed due to the concentrations of target or non-target analytes which would have exceeded the calibration range if analyzed undiluted.
RM-007D	Alkalinity	2-fold	
	Sulfate	10-fold	
RM-007XD	Sulfate	5-fold	
FDUP-002	Sulfate	5-fold	Dilutions were performed due to the concentrations of target or non-target analytes which would have exceeded the calibration range if analyzed undiluted.
RM-401XXD	Alkalinity	2-fold	
	Nitrogen/nitrate + nitrite	2-fold	
RM-402XD	Sulfate	10-fold	
RM-203D	Alkalinity	2-fold	Dilutions were performed due to the concentrations of target or non-target analytes which would have exceeded the calibration range if analyzed undiluted.
RM-102D	Nitrogen/nitrate + nitrite	5-fold	

Select metals and TOC results were reported which were below the lowest calibration standard level and QL (or limit of quantitation [LOQ]). These results were qualified as estimated (J) by the laboratory.

The laboratory's current LOD for chloride, sulfate, nitrogen/nitrate + nitrite, iron, and manganese were below the project action limits specified in the QAPP. No project action limits were specified in the QAPP for alkalinity and TOC.

Memorandum

To: Meredith Westover

From: Chanice Fish (Data Reviewer)
Kristen Morin (Peer Reviewer)

Date: December 28, 2022

Subject: Data Validation Report
Groundwater Samples (Plume Wells): 3rd Quarter 2022
Lemberger Landfill and Lemberger Transport and Recycling/Franklin, Wisconsin
Laboratory Project Number 40253893

SUMMARY

Limited validation (level III) was performed on the data for five groundwater samples (plume wells) and one field duplicate collected from the Lemberger Landfill and Lemberger Transport and Recycling Site in Franklin, Wisconsin. The samples were collected on October 24, 2022. Samples were submitted to Pace Analytical Services, LLC in Green Bay, Wisconsin for analysis. The samples were analyzed for volatile organic compounds (VOCs) using SW-846 Method 8260B.

The laboratory reported the results under laboratory project number 40253893.

The sample results were assessed using the *USEPA National Functional Guidelines for Organic Superfund Methods Data Review (EPA-540-R-20-005)*, November 2020 and the project-specific quality assurance project plan (QAPP), dated September 2011, Revision 1.

In general, the data are valid as reported and may be used for decision-making purposes. The following issues were noted which may have a minor impact on the data usability:

- Select results were reported which were below the lowest calibration standard and quantitation limit (QL); these results were qualified by the laboratory as estimated (J).

SAMPLES

Samples included in this review are listed below.

- RM-202D
- RM-211D
- RM-208D
- RM-401XD
- RM-208XD
- FDUP-003¹

¹ Field duplicate of RM-208XD

REVIEW ELEMENTS

Sample data were reviewed for the following parameters:

- Agreement of analyses conducted with chain-of-custody (COC) requests
- Data completeness
- Holding times and sample preservation
- Gas chromatography/mass spectrometry (GC/MS) tunes
- Initial and continuing calibrations
- Blanks
- Surrogate spike recoveries
- Matrix spike/matrix spike duplicate (MS/MSD) results
- Laboratory control sample (LCS) results
- Internal standard performance
- Field duplicate results
- Quantitation limits and sample results

DISCUSSION

Agreement of Analyses Conducted with Chain-of-Custody Requests

Sample reports were checked to verify that the results corresponded to analytical requests as designated on the COCs. No issues were noted.

Data Completeness

The data package was found to be complete as received from the laboratory with the following exception.

- The laboratory only spiked a subset of the VOCs which were reported in the samples in the LCS and MS/MSD analyses. As a result the accuracy and precision criteria could not be determined for the following four analytes: 2-butanone, 2-hexanone, 4-methyl-2-pentanone, and acetone. No validation action was taken on the basis of this issue.

Holding Times and Sample Preservation

All samples were analyzed within the method-specified holding time. All samples were received by the laboratory on ice and at a temperature within the target range of 0 to 6°C. All samples were noted as properly preserved.

Samples were received by the laboratory four days after collection. As indicated by the field sampler in previous rounds of sampling, when not shipped to the laboratory on the day of collection, samples are stored in coolers, on ice, in a locked former treatment building at the site until delivery to the laboratory. No validation actions were required on this basis since the samples were kept on ice prior to delivery to the laboratory and were received on ice and at acceptable cooler temperatures by the laboratory.

The laboratory noted on the Sample Condition Upon Receipt Form that one of the three vials submitted for sample RM-211D was frozen and arrived shattered. The laboratory was able to perform the analysis with one of the remaining vials; therefore, no validation action was required on this basis.

GC/MS Tunes

All method acceptance criteria were met.

Initial and Continuing Calibrations

The percent relative standard deviations and relative response factors (RRFs) for all target compounds were within the acceptance criteria in the initial calibration. All RRFs and percent differences (%Ds) were within the acceptance criteria in the continuing calibrations. The %Ds which were outside of the acceptance criteria in the VOC initial calibration verification (ICV) standard were not summarized in this memo since the ICV did not immediately precede any VOC sample analyses.

Blanks

Target analytes were not detected in the laboratory method blank.

Surrogate Spike Recoveries

The percent recoveries (%Rs) of the surrogates for all samples were within the laboratory acceptance criteria.

MS/MSD Results

MS/MSD analyses for VOCs were performed on sample RM-208D. The following table summarizes the %R that was outside of the laboratory's acceptance criteria in the MS/MSD analyses and the resulting validation action; all relative percent difference (RPD) criteria were met.

MS/MSD Sample ID	Analyte	MS %R	MSD %R	QC Limits %R	Validation Action
RM-208D	Chloromethane	-	127	42-125	Qualification was required on this basis since chloromethane was non-detect in RM-208D
-: criteria met					

Note that the laboratory only spiked a subset of the VOCs reported in the samples in the MS/MSDs; thus, accuracy and precision could not be evaluated for the following VOCs (which were not spiked) in sample RM-208D: acetone, 2-butanone, 2-hexanone, and 4-methyl-2-pentanone. No validation action was taken on this basis.

LCS Results

An LCS was performed each day prior to sample analysis. All LCS %Rs were within the laboratory's acceptance criteria.

Note that the laboratory only spiked a subset of the VOCs that were reported in the samples in the LCS. Thus, accuracy could not be evaluated for the following VOCs (which were not spiked) in all LCSs: 2-butanone, 2-hexanone, 4-methyl-2-pentanone, and acetone. No validation action was taken on this basis.

Internal Standard Performance

Internal standards were within the method acceptance criteria in all sample analyses.

Field Duplicate Results

Samples RM-208XD and FDUP-003 were submitted as a field duplicate pair with this sample set. Target compounds were not detected in either sample.

Quantitation Limits and Sample Results

No dilutions were performed on the samples in this data set. Select results were reported which were below the lowest calibration standard level and QL (or limit of quantitation [LOQ]). These results were qualified as estimated (J) by the laboratory.

The laboratory's limit of detection (LOD) for select VOCs was above one or both of the project action limits specified in the QAPP. The affected VOCs, project action limits, and current laboratory LODs are summarized in the table below.

Analyte	Affected Samples	WAC Chapter NR 140 PAL ($\mu\text{g/L}$)	WAC Chapter NR 140 ES ($\mu\text{g/L}$)	Laboratory LOD ($\mu\text{g/L}$)
1,1,2,2-Tetrachloroethane	All samples in this sample set	0.02	0.2	0.38
Bromodichloromethane		0.06	0.6*	0.42
Bromoform		0.44	4.4*	3.8
Bromomethane		1	10	1.2
Chloroform		0.6	6*	1.2
Vinyl chloride		0.02	0.2*	0.17
cis-1,3-Dichloropropene		0.02	0.2	0.36
trans-1,3-Dichloropropene		0.02	0.2	3.5

* Laboratory LOD is below action limit

Memorandum

To: Meredith Westover

From: David DiGena-Segal (Data Reviewer)
Elizabeth Denly (Peer Reviewer)

Date: January 3, 2023

Subject: Data Validation Report
VOC Groundwater Samples/Residential Wells: 3rd Quarter 2022
Lemberger Landfill and Lemberger Transport and Recycling/Franklin, Wisconsin
Laboratory Project Numbers 40252421, 40252422, and 40252423

SUMMARY

Full validation (level IV) was performed on the data for 17 groundwater samples, two field duplicates, and two trip blanks collected from residential wells at the Lemberger Landfill and Lemberger Transport and Recycling Site in Franklin, Wisconsin. The samples were collected on September 29 and 30 2022. Samples were submitted to Pace Analytical Services, LLC in Green Bay, Wisconsin for analysis. The samples were analyzed for volatile organic compounds (VOCs) using SW-846 Method 8260B. The laboratory reported the results under laboratory project numbers 40252421, 40252422, and 40252423.

The sample results were assessed using the *USEPA National Functional Guidelines for Organic Superfund Methods Data Review (EPA-540-R-20-005)*, November 2020 and the project-specific quality assurance project plan (QAPP), dated September 2011, Revision 1.

In general, the data are valid as reported and may be used for decision-making purposes. The following issues were noted which have a minor impact on the data usability:

- Select results were reported which were below the lowest calibration standard and quantitation limit (QL); these results were qualified as estimated (J).
- Potential uncertainty exists for the nondetect results for select VOCs in all samples due to continuing calibration nonconformances. These results were qualified as estimated (UJ).
- Potential low bias exists for the nondetect carbon disulfide result in sample GR-26 due to low recovery in the matrix spike duplicate analysis. This result was qualified as estimated (UJ).

SAMPLES

Samples included in this review are listed below.

Laboratory Project Number 40252421: collected 9/29/22

- GR-14
- GR-64
- GR-16
- GR-66
- GR-63
- TB-001 (09/29/22)

Laboratory Project Number 40252422: collected 9/29/22

- GR-26
- GR-30
- GR-60R
- GR-73
- GR-74
- GR-FDUP-001¹

Laboratory Project Number 40252423: collected 9/30/22

- GR-8
- GR-9
- GR-10
- GR-11
- GR-12
- GR-62
- GR-65
- GR-FDUP-002²
- TB-001 (09/30/22)

¹ Field duplicate of GR-73

² Field duplicate of GR-62

REVIEW ELEMENTS

Sample data were reviewed for the following parameters:

- Agreement of analyses conducted with chain-of-custody (COC) requests
- Data completeness
- Holding times and sample preservation
- Gas chromatography/mass spectrometry (GC/MS) tunes
- Initial and continuing calibrations
- Blanks
- Surrogate spike recoveries
- Matrix spike/matrix spike duplicate (MS/MSD) results
- Laboratory control sample (LCS) results
- Internal standard performance
- Field duplicate results
- Quantitation limits (QLs) and sample results
- Target compound identification

DISCUSSION

Agreement of Analyses Conducted with Chain-of-Custody Requests

Sample reports were checked to verify that the results corresponded to analytical requests as designated on the COC. No issues were noted.

Data Completeness

The data packages were found to be complete as received from the laboratory with the following exception.

- The laboratory only spiked a subset of the VOCs which were reported in the samples in the LCS and MS/MSDs. Thus, accuracy and/or precision could not be evaluated for select VOCs. No validation actions were taken on the basis of this issue.

Holding Times and Sample Preservation

All samples were received by the laboratory on ice but were otherwise unpreserved. All analyses were performed within the method-specified holding time for unpreserved samples; therefore, no validation action was required on this basis.

Note that samples were received by the laboratory three to four days after collection. Samples were stored in coolers, on ice, in a locked former treatment building at the site until delivery to the laboratory. No validation actions were required on this basis since the samples were kept on ice prior to delivery to the laboratory and were received on ice by the laboratory.

GC/MS Tunes

The frequency and abundance of all bromofluorobenzene tunes were within the acceptance criteria.

Initial and Continuing Calibrations

The percent relative standard deviations, coefficients of determination, and relative response factors (RRFs) were within the laboratory acceptance criteria in the initial calibrations.

All RRFs were within the acceptance criteria in the continuing calibrations (CCs). The following table summarizes the percent differences or percent drifts (%Ds) which were outside of the laboratory acceptance criteria in the CCs, the associated samples and validation actions.

CC	Analyte	%D	Associated Sample(s)	Validation Actions
40MSV8 10/05/22 @06:55	Bromomethane	-34.6589	TB-001 (09/29/22), GR-14, GR-16, GR-63, GR-64, GR-66 GR-26, GR-30, GR-60R, GR-73, GR-74, GR-FDUP-001 GR-8, GR-9, GR-10, GR-11, GR-12, GR-62, GR-65, GR-FDUP-002	The nondetect results for the listed VOCs were qualified as estimated (UJ) in the associated samples.
	Carbon tetrachloride	-20.0497		
	2-Hexanone	27.5267		
	4-Methyl-2-pentanone (MIBK)	29.5451		
	1,1,2,2-Tetrachloroethane	21.8729		
40MSVC 10/06/22 @15:59	Bromomethane	21.5875	TB-001 (09/30/22)	The nondetect result for the listed VOC was qualified as estimated (UJ) in the associated sample.

Blanks

A method blank was analyzed each day prior to sample analysis. Target analytes were not detected in the trip blanks or method blanks.

Surrogate Spike Recoveries

The percent recoveries (%Rs) of the surrogates were within the laboratory acceptance criteria for all samples.

MS/MSD Results

MS/MSD analyses were performed on sample GR-26 in laboratory project number 40252422. The relative percent differences (RPDs) were within the acceptance criteria. The %Rs met the acceptance criteria in the MS/MSD analyses with the exception shown in the table below.

Sample ID	Compound	MS %R	MSD %R	%R QC Limits	Validation Action
GR-26	Carbon disulfide	-	64	70-130	The nondetect result for carbon disulfide was qualified as estimated (UJ) in sample GR-26.
-: Met Criteria					

Note that the laboratory only spiked a subset of the VOCs which were reported in the samples in the MS/MSDs; thus, accuracy and precision could not be evaluated for the following VOCs (which were not spiked) in the MS/MSD analyses: acetone, 2-butanone, 2-hexanone, and 4-methyl-2-pentanone. No validation action was taken on this basis.

LCS Results

An LCS was performed on each day of analysis. Spike %R criteria were met for all LCS analyses with the exceptions shown in the table below.

LCS ID	Compound	%R	%R QC Limits	Validation Action
2462604LCS	Chloromethane	131	55-122	No qualification was required since chloromethane was nondetect in the associated samples.
Associated Samples: TB-001 (09/29/22), GR-14, GR-16, GR-63, GR-64, GR-66, GR-26, GR-30, GR-60R, GR-73, GR-74, GR-FDUP-001, GR-8, GR-9, GR-10, GR-11, GR-12, GR-62, GR-65, GR-FDUP-002				
2463363LCS	Chloromethane	131	55-122	No qualification was required since chloromethane was nondetect in the associated sample.
Associated Sample: TB-001 (09/30/22)				

Note that the laboratory only spiked a subset of the VOCs that were reported in the samples in the LCS. Thus, accuracy could not be evaluated for the following VOCs (which were not spiked) in the LCS analyses: acetone, 2-butanone, 2-hexanone, and 4-methyl-2-pentanone. No validation action was taken on this basis.

Internal Standard Performance

Internal standards were within the method acceptance criteria in all sample analyses.

Field Duplicate Results

The following samples were submitted as the field duplicate pairs with this data set:

- GR-73 and GR-FDUP-001 (Laboratory Project Number 40252422)
- GR-62 and GR-FDUP-002 (Laboratory Project Number 40252423)

All target analytes were nondetect in both samples of each field duplicate pair; therefore, all criteria were met.

Quantitation Limits and Sample Results

Sample calculations were spot-checked; there were no errors noted. No dilutions were performed in the VOC analyses of these samples.

Select results were reported which were below the lowest calibration standard level and QL (or limit of quantitation [LOQ]). These results were qualified as estimated (J) by the laboratory.

The laboratory's limit of detection (LOD) for select VOCs was above one or both of the project action limits specified in the QAPP; the affected VOCs, project action limits, and current laboratory LODs are summarized in the table below.

Analyte	Affected Samples	WAC Chapter NR 140 PAL ($\mu\text{g}/\text{L}$)	WAC Chapter NR 140 ES ($\mu\text{g}/\text{L}$)	Laboratory LOD ($\mu\text{g}/\text{L}$)
1,1,2,2-Tetrachloroethane	All samples in this data set	0.02	0.2	0.38
Bromodichloromethane		0.06	0.6*	0.42
Bromoform		0.44	4.4*	3.8
Bromomethane		1	10*	1.2
Chloroform		0.6	6*	1.2
cis-1,3-Dichloropropene		0.02	0.2	0.36
trans-1,3-Dichloropropene		0.02	0.2	3.5
Vinyl chloride		0.02	0.2*	0.17

* Laboratory LOD is below the action limit.

Target Compound Identification

All criteria were met.

QUALIFIED FORM 1s

Memorandum

To: Meredith Westover

From: David DiGena-Segal (Data Reviewer)
Elizabeth Denly (Peer Reviewer)

Date: January 11, 2023

Subject: Data Validation Report
VOC Groundwater Samples/Sentinel Wells: 3rd Quarter 2022
Lemberger Landfill and Lemberger Transport and Recycling/Franklin, Wisconsin
Laboratory Project Number 40252499

SUMMARY

Full validation (level IV) was performed on the data for 6 groundwater samples, one field duplicate, one trip blank, and one field blank collected from sentinel wells at the Lemberger Landfill and Lemberger Transport and Recycling Site in Franklin, Wisconsin. The samples were collected on September 29 and 30, 2022. Samples were submitted to Pace Analytical Services, LLC in Green Bay, Wisconsin for analysis. The samples were analyzed for volatile organic compounds (VOCs) using SW-846 Method 8260B. The laboratory reported the results under laboratory project number 40252499.

The sample results were assessed using the *USEPA National Functional Guidelines for Organic Superfund Methods Data Review (EPA-540-R-20-005)*, November 2020 and the project-specific quality assurance project plan (QAPP), dated September 2011, Revision 1.

In general, the data are valid as reported and may be used for decision-making purposes. The following issues were noted which have a minor impact on the data usability:

- Select results were reported which were below the lowest calibration standard and quantitation limit (QL); these results were qualified as estimated (J).
- Potential uncertainty exists for the 1,1-dichloroethane result in sample RM-401XXD due to MS/MSD variability. This result was qualified as estimated (J).

SAMPLES

Samples included in this review are listed below.

¹ Field duplicate of RM-003XXD

REVIEW ELEMENTS

Sample data were reviewed for the following parameters:

- Agreement of analyses conducted with chain-of-custody (COC) requests
- Data completeness
- Holding times and sample preservation
- Gas chromatography/mass spectrometry (GC/MS) tunes
- Initial and continuing calibrations
- Blanks
- Surrogate spike recoveries
- Matrix spike/matrix spike duplicate (MS/MSD) results
- Laboratory control sample (LCS) results
- Internal standard performance
- Field duplicate results
- Quantitation limits (QLs) and sample results
- Target compound identification

DISCUSSION

Agreement of Analyses Conducted with Chain-of-Custody Requests

Sample reports were checked to verify that the results corresponded to analytical requests as designated on the COC. No issues were noted.

Data Completeness

The data packages were found to be complete as received from the laboratory with the following exception.

- The laboratory only spiked a subset of the VOCs which were reported in the samples in the LCS and MS/MSDs. Thus, accuracy and/or precision could not be evaluated for select VOCs. No validation actions were taken on the basis of this issue.

Holding Times and Sample Preservation

All holding time and sample preservation criteria were met

Note that samples were received by the laboratory four to five days after collection. Samples were stored in coolers, on ice, in a locked former treatment building at the site until delivery to the laboratory. No validation actions were required on this basis since the samples were kept on ice prior to delivery to the laboratory and were received on ice by the laboratory.

GC/MS Tunes

The frequency and abundance of all bromofluorobenzene tunes were within the acceptance criteria.

Initial and Continuing Calibrations

The percent relative standard deviations, coefficients of determination, and relative response factors (RRFs) were within the laboratory acceptance criteria in the initial calibrations.

All RRFs and percent differences or percent drifts were within the acceptance criteria in the continuing calibrations.

Blanks

A method blank was analyzed each day prior to sample analysis. Target analytes were not detected in the trip blank or method blanks. The following table summarizes the compound that was detected in the field blank and the resulting validation actions.

Blank ID	Compound	Blank Concentration ($\mu\text{g}/\text{L}$)	2x Blank Concentration ($\mu\text{g}/\text{L}$)	QL ($\mu\text{g}/\text{L}$)	Validation Action
FB-001	Toluene	1.1	2.2	1.0	Qualification was not required since toluene was nondetect in the associated samples.
Associated samples: All samples in SDG 40252499					

Surrogate Spike Recoveries

The percent recoveries (%Rs) of the surrogates were within the laboratory acceptance criteria for all samples.

MS/MSD Results

MS/MSD analyses were performed on sample RM-401XXD. The %Rs were within the acceptance criteria. The relative percent differences (RPDs) met the acceptance criteria in the MS/MSD analyses with the exception shown in the table below.

Sample ID	Compound	RPD	RPD QC Limits	Validation Action
RM-401XXD	1,1-Dichloroethane	26	20	The positive result for 1,1-dichloroethane was qualified as estimated (J) in sample RM-401XXD.

Note that the laboratory only spiked a subset of the VOCs which were reported in the samples in the MS/MSDs; thus, accuracy and precision could not be evaluated for the following VOCs (which were not spiked) in the MS/MSD analyses: acetone, 2-butanone, 2-hexanone, and 4-methyl-2-pentanone. No validation action was taken on this basis.

LCS Results

An LCS was performed on each day of analysis. Spike %R criteria were met for all LCS analyses with the exception shown in the table below.

LCS ID	Compound	%R	%R QC Limits	Validation Action
2463777LCS	Chloromethane	131	51-122	No qualification was required since chloromethane was nondetect in the associated samples.
Associated samples: FB-001, TB-001				

Note that the laboratory only spiked a subset of the VOCs that were reported in the samples in the LCS. Thus, accuracy could not be evaluated for the following VOCs (which were not spiked) in the LCS analyses: acetone, 2-butanone, 2-hexanone, and 4-methyl-2-pentanone. No validation action was taken on this basis.

Internal Standard Performance

Internal standards were within the method acceptance criteria in all sample analyses.

Field Duplicate Results

The following samples were submitted as the field duplicate pair with this data set:

- RM-003XXD and FDUP-001

The duplicate RPD is not applicable for comparison of results if either concentration is <5x the QL; comparison in this case is based on the absolute difference (AbsD) between the results. The acceptance limits for field duplicates in aqueous media is ≤30% for the RPD (where appropriate) and <QL for the AbsD. For analytes that are detected in one sample and nondetect in the other, the QL is used to represent the nondetect result in the AbsD calculation. The following table summarizes the detected results, the RPD or AbsD values (as applicable) for the detected analytes in each field duplicate pair, and the resulting validation actions. As shown in the table, criteria were met for all detected analytes.

Analyte	QL (µg/L)	RM-003XXD (µg/L)	FDUP-001 (µg/L)	RPD (%) or AbsD (µg/L)	Validation Actions
1,1-Dichloroethane	1.0	3.5	3.4	AbsD: 0.1	None. All criteria were met.
1,1-Dichloroethene	1.0	0.76 J	0.63 J	AbsD: 0.13	
cis-1,2-Dichloroethene	1.0	1.3	1.5	AbsD: 0.2	
1,1,1-Trichloroethane	1.0	6.0	6.4	AbsD: 0.4	
Trichloroethene	1.0	1.8	1.9	AbsD: 0.1	

Criteria: RPD ≤ 30%; AbsD < QL

Quantitation Limits and Sample Results

Sample calculations were spot-checked; there were no errors noted. No dilutions were performed in the VOC analyses of these samples.

Select results were reported which were below the lowest calibration standard level and QL (or limit of quantitation [LOQ]). These results were qualified as estimated (J) by the laboratory.

The laboratory's limit of detection (LOD) for select VOCs was above one or both of the project action limits specified in the QAPP; the affected VOCs, project action limits, and current laboratory LODs are summarized in the table below.

Analyte	Affected Samples	WAC Chapter NR 140 PAL ($\mu\text{g}/\text{L}$)	WAC Chapter NR 140 ES ($\mu\text{g}/\text{L}$)	Laboratory LOD ($\mu\text{g}/\text{L}$)
1,1,2,2-Tetrachloroethane	All samples in this data set	0.02	0.2	0.38
Bromodichloromethane		0.06	0.6*	0.42
Bromoform		0.44	4.4*	3.8
Bromomethane		1	10*	1.2
Chloroform		0.6	6*	1.2
cis-1,3-Dichloropropene		0.02	0.2	0.36
trans-1,3-Dichloropropene		0.02	0.2	3.5
Vinyl chloride		0.02	0.2*	0.17

* Laboratory LOD is below the action limit.

Target Compound Identification

All criteria were met.

Iron, dissolved	µg/L		300	150	300
Iron, total	µg/L		300	150	300
Lead, dissolved	µg/L	15		1.5	15
Lead, total	µg/L	15		1.5	15
Manganese, dissolved	µg/L		50	60	300
Manganese, total	µg/L		50	60	300
Mercury, dissolved	µg/L	2		0.2	2
Mercury, total	µg/L	2		0.2	2
Methanol	µg/L			1000	5000
Methoxychlor	µg/L	40		4	40
Methylene chloride	µg/L	5		0.5	5

Attachment 2 (continued)
Groundwater Quality Standards

Parameter Name	Units	MCL	SMCL	NR PAL	NR ES
N-hexane	µg/L			120	600
Nickel, dissolved	µg/L			20	100
Nickel, total	µg/L			20	100
Nitrogen, ammonia	mg/L			0.97	9.7
N-nitrosodiphenylamine	µg/L			0.7	7
Pentachlorophenol	µg/L	1		0.1	1
Prometon	µg/L			20	100
Pyrene	µg/L			50	250
Pyridine	µg/L			2	10
Selenium, dissolved	µg/L	50		10	50
Selenium, total	µg/L	50		10	50
Silver, dissolved	µg/L		100	10	50
Silver, total	µg/L		100	10	50
Styrene	µg/L	100		10	100
Tetrachloroethene	µg/L	5		0.5	5
Thallium, dissolved	µg/L	2		0.4	2
Thallium, total	µg/L	2		0.4	2
Toluene	µg/L	1000		160	800
Toxaphene	µg/L	3		0.3	3
trans-1,2-Dichloroethene	µg/L	100		20	100
Trichloroethene	µg/L	5		0.5	5
Trimethylbenzenes, total	µg/L			96	480
Vanadium, dissolved	µg/L			6	30
Vanadium, total	µg/L			6	30
Vinyl chloride	µg/L	2		0.02	0.2
Xylenes, total	µg/L	10000		400	2000
Zinc, dissolved	µg/L		5000	2500	5000
Zinc, total	µg/L		5000	2500	5000

Note:

Table updated June 2022 to reflect June 2021 register #786 (WDNR) and latest USEPA MCLs.

(1) MCL, ES, and PAL apply to total PCBs.

REPORT OF LABORATORY ANALYSIS

This report shall not be reproduced, except in full,
without the written consent of Pace Analytical Services, LLC.

QUALIFIERS

Project: 473040.0000PH4 LEMBERGER LF RE
Pace Project No.: 40252422

DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to dilution of the sample aliquot.

ND - Not Detected at or above LOD.

J - Estimated concentration at or above the LOD and below the LOQ.

LOD - Limit of Detection adjusted for dilution factor, percent moisture, initial weight and final volume.

LOQ - Limit of Quantitation adjusted for dilution factor, percent moisture, initial weight and final volume.

S - Surrogate

1,2-Diphenylhydrazine decomposes to and cannot be separated from Azobenzene using Method 8270. The result for each analyte is a combined concentration.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected at or above the adjusted LOD.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

ANALYTE QUALIFIERS

L1 Analyte recovery in the laboratory control sample (LCS) was above QC limits. Results may be biased high.

M1 Matrix spike recovery exceeded QC limits. Batch accepted based on laboratory control sample (LCS) recovery.

REPORT OF LABORATORY ANALYSIS

This report shall not be reproduced, except in full,
without the written consent of Pace Analytical Services, LLC.

QUALIFIERS

Project: 473040.0000PH4 LEMBERGER LF RE

Pace Project No.: 40252423

DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to dilution of the sample aliquot.

ND - Not Detected at or above LOD.

J - Estimated concentration at or above the LOD and below the LOQ.

LOD - Limit of Detection adjusted for dilution factor, percent moisture, initial weight and final volume.

LOQ - Limit of Quantitation adjusted for dilution factor, percent moisture, initial weight and final volume.

S - Surrogate

1,2-Diphenylhydrazine decomposes to and cannot be separated from Azobenzene using Method 8270. The result for each analyte is a combined concentration.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected at or above the adjusted LOD.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

ANALYTE QUALIFIERS

L1 Analyte recovery in the laboratory control sample (LCS) was above QC limits. Results may be biased high.

M0 Matrix spike recovery and/or matrix spike duplicate recovery was outside laboratory control limits.

M1 Matrix spike recovery exceeded QC limits. Batch accepted based on laboratory control sample (LCS) recovery.

REPORT OF LABORATORY ANALYSIS

This report shall not be reproduced, except in full,

NOTES:

Laboratory data qualifiers are included in the laboratory reports in Attachment 7. See specific laboratory report for Sample Delivery Group (SDG) definition.

Non-detect results are reported as "< Limit of Detection (LOD)"

Data Validation Qualifiers:

u = data validation rules result as not detected

j = the result is estimated

j+ = the result is estimated with a positive bias.

j- = the result is estimated with a negative bias.

Laboratory Data Qualifiers for Monitoring Wells

QUALIFIERS

Project: 473040.0000PH4 LEMBERGER LF RE
Pace Project No.: 40252421

DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to dilution of the sample aliquot.

ND - Not Detected at or above LOD.

J - Estimated concentration at or above the LOD and below the LOQ.

LOD - Limit of Detection adjusted for dilution factor, percent moisture, initial weight and final volume.

LOQ - Limit of Quantitation adjusted for dilution factor, percent moisture, initial weight and final volume.

S - Surrogate

1,2-Diphenylhydrazine decomposes to and cannot be separated from Azobenzene using Method 8270. The result for each analyte is a combined concentration.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected at or above the adjusted LOD.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

ANALYTE QUALIFIERS

L1 Analyte recovery in the laboratory control sample (LCS) was above QC limits. Results may be biased high.

M1 Matrix spike recovery exceeded QC limits. Batch accepted based on laboratory control sample (LCS) recovery.

REPORT OF LABORATORY ANALYSIS

This report shall not be reproduced, except in full,
without the written consent of Pace Analytical Services, LLC.

RM-402XD	Sulfate, total	323	j+	MG/L	X		400' Northwest of LTR site
RM-402XD	Tetrachloroethene	0.8	J	UG/L		X	400' Northwest of LTR site
RM-402XD	Trichloroethene	11.7		UG/L	X		400' Northwest of LTR site
RM-402XXD	1,1-Dichloroethene	2.7		UG/L		X	400' Northwest of LTR site
RM-402XXD	Trichloroethene	5		UG/L	X		400' Northwest of LTR site
RM-403XD	1,1,1-Trichloroethane	96.9		UG/L		X	400' West of LTR site
RM-403XD	1,1-Dichloroethene	8		UG/L	X		400' West of LTR site
RM-403XD	cis-1,2-Dichloroethene	17.3		UG/L		X	400' West of LTR site
RM-403XD	Tetrachloroethene	1.3		UG/L		X	400' West of LTR site
RM-403XD	Trichloroethene	17.4		UG/L	X		400' West of LTR site
RM-404XXD	Nitrogen, nitrate + nitrite	2.6		MG/L		X	1,200' Northwest of LL Site
RM-404XXD	Trichloroethene	0.5	J	UG/L		X	1,200' Northwest of LL Site

Notes:

¹ Table includes exceedances where the reported concentration is between the Limit of Detection and Limit of Quantitation ("J" data qualifier).

² ES =Wisconsin Administrative Code NR140 Enforcement Standard

³ PAL =Wisconsin Administrative Code NR140 Preventive Action Limit

⁴ LTR = Lemberger Transport and Recycling

⁵ LL = Lemberger Landfill

Laboratory qualifiers are included in the sample-specific laboratory reports. See laboratory reports for the SDG-specific definitions.

Notice: Personally identifiable information collected will be used for program administration and enforcement purposes. The Department may also provide this information to requesters as required under Wisconsin's Open Records law, ss. 19.31 to 19.39, Wis. Stats.
When submitting monitoring data, the owner or operator of the facility, practice or activity is required to notify the Department in writing that a groundwater standard or an explosive gas level has been attained or exceeded, as specified in ss. NR 140.24(1)(a); NR 140.26(1)(a); NR 507.30NR 635.14(9)(a); NR 635.18(20) and NR 507.30, Wis. Adm. Code. Failure to report may result in fines, forfeitures or other penalties resulting from enforcement under ss. 289.97, 291.97 or 299.95, Wis. Stats.

Instructions:

- Prepare one form for each license or monitoring ID.
- Please type or print legibly.
- Attach a notification of any values that attain or exceed groundwater standards (that is, preventive action limits, enforcement standards or alternative concentration limits). The notification must include a preliminary analysis of the cause and significance of each value.
- Attach a notification of any gas values that attain or exceed explosive gas levels.
- Send the original signed form, any notification, and Electronic Data Deliverable [EDD] to:

GEMS Data Submittal Contact - WA/5

Monitoring Data Submittal Information

Name of entity submitting data (laboratory, consultant, facility owner)

TRC Environmental Corp.

Contact for questions about data formatting. Include data preparer's name, telephone number and Email address:

Name Meredith Westover	Phone No. (include area code) (608) 358-5035
Email mwestover@trccompanies.com	

Facility Name

Lemberger Landfill

License # / Monitoring ID 00753	Facility ID (FID) 436016790
Actual sampling dates (e.g., July 2-6, 2003) 7/31,8/31,9/29-30,10/13-14,10/24-28, 2022	The enclosed results are for sampling required in the month(s) of: (e.g., June 2003) July, August, and September 2022

Type of Data Submitted (Check all that apply):

- | | |
|---|--|
| <input checked="" type="checkbox"/> Groundwater monitoring data from monitoring wells | <input type="checkbox"/> Gas monitoring data |
| <input checked="" type="checkbox"/> Groundwater monitoring data from private water supply wells | <input type="checkbox"/> Air monitoring data |
| <input checked="" type="checkbox"/> Leachate monitoring data | <input type="checkbox"/> Other (specify): |

Notification attached?

- | |
|--|
| <input type="checkbox"/> No. No groundwater standards or explosive gas limits were exceeded. |
| <input checked="" type="checkbox"/> Yes, a notification of values exceeding a groundwater standard is attached. It includes a list of monitoring points, dates, sample values, groundwater standard and preliminary analysis of the cause and significance of any concentration. |
| <input type="checkbox"/> Yes, a notification of values exceeding an explosive gas limit is attached. It includes the monitoring points, dates, sample values and explosive gas limits. |

Certification

To the best of my knowledge, the information reported and statements made on this data submittal and attachments are true and correct. Furthermore, I have attached complete notification of any sampling values meeting or exceeding groundwater standards or explosive gas levels, and a preliminary analysis of the cause and significance of concentrations exceeding groundwater standards.
