

October 12, 2023

Ms. Demaree Collier
Remedial Project Manager
USEPA Region 5
77 West Jackson Boulevard
Chicago, IL 60604

Subject: Transmittal of Data
Residential, Plume Monitoring, and Background Wells
Lemberger Landfill Sites
First Quarter 2023

Dear Ms. Collier:

On behalf of the Lemberger Site Remediation Group (LSRG), and in accordance with the Environmental Monitoring Plan (EMP), Revision 5 (February 2021), and the subsequent monitoring program revisions as approved by the United States Environmental Protection Agency (USEPA) and the Wisconsin Department of Natural Resources (WDNR), TRC Environmental Corporation (TRC) is submitting the following data:

- Attachment 1: Data Validation Comments and Qualified Form 1s For All Wells
- Attachment 2: Table of Wisconsin Administrative Code Chapter NR 140 Groundwater Quality Standards (Enforcement Standards [ESs], Preventive Action Limits [PALs], Maximum Contaminant Levels [MCLs], and Secondary Maximum Contaminant Levels [SMCLs]) for the Pertinent Parameters
- Attachment 3: Tabular Summary of Analytical Results at Each Monitoring Well
- Attachment 4: Laboratory Data Qualifiers for Monitoring Wells
- Attachment 5: Tabular Summary of Groundwater Standard Exceedances at Plume Monitoring Wells

A CD containing field and laboratory data in an approved WDNR format has been attached to the copies provided to the WDNR and the USEPA, for their use. Groundwater samples were collected during March and April 2023, in accordance with the February 2021 EMP, revision 5.

Please call if you have questions.

Sincerely,

TRC

Kristopher D. Krause, P.E.
Senior Project Manager

Meredith Westover, P.G.
Senior Hydrogeologist

Data Validation Comments and Qualified Form 1s For All Wells

Memorandum

To: Meredith Westover

From: David DiGena-Segal (Data Reviewer)
Elizabeth Denly (Peer Reviewer)

Date: July 11, 2023

Subject: Data Validation Report
VOC Groundwater Samples/Plume Wells: 1st Quarter 2023
Lemberger Landfill and Lemberger Transport and Recycling/Franklin, Wisconsin
Laboratory Project Number 40260906 (Revised 06/27/23)

SUMMARY

Limited validation (level III) was performed on the data for 10 groundwater samples, one field duplicate, one field blank, and one trip blank collected at the Lemberger Landfill and Lemberger Transport and Recycling Site in Franklin, Wisconsin. The samples were collected April 7-9, 2023. Samples were submitted to Pace Analytical Services, LLC in Green Bay, Wisconsin for analysis. The samples were analyzed for volatile organic compounds (VOCs) using SW-846 method 8260B. The laboratory reported the results under laboratory project number 40260906.

The sample results were assessed using the *USEPA National Functional Guidelines for Organic Superfund Methods Data Review (EPA-540-R-20-005)*, November 2020 and the project-specific quality assurance project plan (QAPP), dated October 2022, Revision 0.

In general, the data are valid as reported and may be used for decision-making purposes. The following issues were noted which may have a minor impact on the data usability:

- Select results were reported which were below the lowest calibration standard and quantitation limit (QL); these results were qualified by the laboratory as estimated (J).
- Potential uncertainty exists for the nondetect results for select VOCs in certain samples due to continuing calibration nonconformances. These results were qualified as estimated (UJ).
- Samples RM-007XD, RM-005D, RM-208D, FDUP-002, TB-002, RM-211D, RM-008D, RM-402XXD, RM-402XD, and RM-204D had minor headspace in the vials used for analysis; all results in these samples were qualified as estimated with potential low bias (J-/UJ). It should be noted that the positive results for 1,1-dichloroethane and 1,1,1-trichloroethane in sample RM-211D, tetrachloroethene in sample RM-008D, and 1,1-dichloroethene in sample RM-204D were also qualified as estimated (J) due to detection below the QL; the overall qualification for these compounds in these samples was J.

SAMPLES

Samples included in this review are listed below.

- | | | |
|-----------|------------|------------|
| • RM-005D | • RM-007XD | • RM-008D |
| • RM-204D | • RM-208D | • RM-211D |
| • RM-307D | • RM-401XD | • RM-402XD |

- RM-402XXD
- FDUP-002¹
- TB-002
- FB-002

¹ FDUP-002: Field duplicate of RM-208D

REVIEW ELEMENTS

Sample data were reviewed for the following parameters:

- Agreement of analyses conducted with chain-of-custody (COC) requests
- Data completeness
- Holding times and sample preservation
- Gas chromatography/mass spectrometry (GC/MS) tunes
- Initial and continuing calibrations
- Blanks
- Surrogate spike recoveries
- Matrix spike/matrix spike duplicate (MS/MSD) results
- Laboratory control sample (LCS) results
- Internal standard performance
- Field duplicate results
- Quantitation limits and sample results

DISCUSSION

Agreement of Analyses Conducted with Chain-of-Custody Requests

The sample report was checked to verify that the results corresponded to analytical requests as designated on the COC. The samples in this data set were analyzed for VOCs using SW-846 Method 8260B; according to the QAPP, the samples should have been analyzed for VOCs using SW-846 Method 8260D. No validation actions were taken based on this issue.

Data Completeness

The data package was found to be complete as received from the laboratory with the following exceptions.

- The laboratory only spiked a subset of the VOCs which were reported in the samples in the LCS and MS/MSD analyses. Thus, accuracy and/or precision could not be evaluated for select VOCs.
- Select samples were improperly marked for headspace; the laboratory was contacted about this issue and provided a revised report on 06/27/23.

No validation actions were taken on the basis of this issue.

Holding Times and Sample Preservation

All holding time and sample preservation criteria were met with the following exception: samples RM-007XD, RM-005D, RM-208D, FDUP-002, TB-002, RM-211D, RM-008D, RM-402XXD, RM-402XD,

and RM-204D had headspace observed upon receipt by the laboratory. The positive and nondetect result for all VOCs in samples RM-007XD, RM-005D, RM-208D, FDUP-002, TB-002, RM-211D, RM-008D, RM-402XXD, RM-402XD, and RM-204D were qualified as estimated (J-/UJ) with a potential low bias due to the headspace. It should be noted that the positive results for 1,1-dichloroethane and 1,1,1-trichloroethane in sample RM-211D, tetrachloroethene in sample RM-008D, and 1,1-dichloroethene in sample RM-204D were also qualified as estimated (J) due to detection below the QL; the overall qualification for these compounds in these samples was J.

Samples were received by the laboratory between 9-11 days after collection. Samples were stored in coolers, on ice, in a locked former treatment building at the site until delivery to the laboratory. No validation actions were required on this basis since the samples were kept on ice prior to delivery to the laboratory and were received on ice and at acceptable cooler temperatures by the laboratory.

GC/MS Tunes

The frequency and abundance of all bromofluorobenzene tunes were within the acceptance criteria.

Initial and Continuing Calibrations

The coefficients of determination, percent relative standard deviations, and relative response factors (RRFs) for all target compounds were within the laboratory acceptance criteria in the initial calibrations.

All RRFs were within the acceptance criteria in the continuing calibrations (CCs). The following table summarizes the percent differences (%Ds) which were outside of the laboratory acceptance criteria in the CCs, the associated samples and validation actions.

CC	Analyte	%D	Associated Sample(s)	Validation Actions
40MSV8 04/20/23 @08:57	Acetone	34.8983	RM-007XD, RM-008D, RM-208D, RM-211D, RM-401XD, RM-402XD, RM-402XXD, FDUP-002, TB-002	The nondetect results for the listed VOCs were qualified as estimated (UJ) in the associated samples.
	Chloromethane	-23.4771		
	2-Hexanone	28.4237		
	4-Methyl-2-pentanone (MIBK)	22.9508		
40MSV8 04/21/2023 @07:00	Acetone	24.5672	RM-204D, FB-002	
	2-Hexanone	26.0794		
	4-Methyl-2-pentanone (MIBK)	23.7070		

Blanks

Target analytes were not detected in the trip blank or method blanks. Toluene (0.63 ug/L) was detected in the field blank, FB-002, associated with all samples. Qualification of the data was not required since toluene was not detected in the associated samples.

Surrogate Spike Recoveries

The percent recoveries (%Rs) of the surrogates were within the laboratory acceptance criteria for all samples.

MS/MSD Results

MS/MSD analyses were performed on sample RM-005D. All criteria were met.

Note that the laboratory only spiked a subset of the VOCs which were reported in the samples in the MS/MSDs; thus, accuracy and precision could not be evaluated for the following VOCs (which were not spiked) in the MS/MSD analyses: acetone, 2-butanone, 2-hexanone, and 4-methyl-2-pentanone. No validation action was taken on this basis.

LCS Results

An LCS was performed on each day of analysis. All criteria were met.

Note that the laboratory only spiked a subset of the VOCs that were reported in the samples in the LCS. Thus, accuracy could not be evaluated for the following VOCs (which were not spiked) in the LCS analyses: acetone, 2-butanone, 2-hexanone, and 4-methyl-2-pentanone. No validation action was taken on this basis.

Internal Standard Performance

Internal standards were within the method acceptance criteria in all sample analyses.

Field Duplicate Results

The samples listed below were submitted as the field duplicate pair with this data set.

- RM-208D and FDUP-002

The relative percent difference (RPD) is not applicable for comparison of results if either concentration is <5x the QL; comparison in this case is based on the absolute difference (AbsD) between the results. The acceptance limits for field duplicates in aqueous media is $\leq 30\%$ for the RPD and $< QL$ for the AbsD. For analytes that are detected in one sample and nondetect in the other, the QL is used to represent the nondetect result in the AbsD calculation. The following table summarizes the detected results, the RPD or AbsD values (as applicable) for the detected analytes in each field duplicate pair, and the resulting validation actions. As shown in the table, criteria were met for all detected analytes.

Analyte	QL ($\mu\text{g}/\text{L}$)	RM-208D ($\mu\text{g}/\text{L}$)	FDUP-002 ($\mu\text{g}/\text{L}$)	RPD (%) or AbsD ($\mu\text{g}/\text{L}$)	Validation Actions
1,1,1-Trichloroethane	1.0	5.4	5.3	RPD: 1.9	None. All criteria were met.
1,1-Dichloroethane	1.0	3.6	3.5	AbsD = 0.1	
1,1-Dichloroethene	1.0	1.5	1.3	AbsD: 0.2	
Trichloroethene	1.0	1.6	1.6	AbsD: 0.0	
cis-1,2-Dichloroethene	1.0	3.4	3.4	AbsD: 0.0	

Criteria: RPD $\leq 30\%$; AbsD $< QL$

Quantitation Limits and Sample Results

Sample calculations were spot-checked; there were no errors noted. No dilutions were performed in the VOC analyses of these samples.

Select results were reported which were below the lowest calibration standard level and QL (or limit of quantitation [LOQ]). These results were qualified as estimated (J) by the laboratory.

The laboratory's limit of detection (LOD) for select VOCs was above one or both of the project action limits specified in the QAPP; the affected VOCs, project action limits, and current laboratory LODs are summarized in the table below.

Analyte	Affected Samples	WAC Chapter NR 140 PAL ($\mu\text{g}/\text{L}$)	WAC Chapter NR 140 ES ($\mu\text{g}/\text{L}$)	Laboratory LOD ($\mu\text{g}/\text{L}$)
1,1,2,2-Tetrachloroethane	All samples in this data set	0.02	0.2	0.38
Bromodichloromethane		0.06	0.6*	0.42
Bromomethane		1	10*	1.2
cis-1,3-Dichloropropene		0.04	0.4*	0.24
trans-1,3-Dichloropropene		0.04	0.4*	0.27
Vinyl chloride		0.02	0.2*	0.17

* Laboratory LOD is below the action limit.

Date: June 30, 2023

Subject: Data Validation Report
VOC Groundwater Samples/Sentinel Wells: 1st Quarter 2023
Lemberger Landfill and Lemberger Transport and Recycling/Franklin, Wisconsin
Laboratory Project Number 40260905 (Revised 06/27/23)

SUMMARY

Full validation (stage IV) was performed on the data for six groundwater samples, one field duplicate, one trip blank, and one field blank collected from sentinel wells at the Lemberger Landfill and Lemberger Transport and Recycling Site in Franklin, Wisconsin. The samples were collected on April 7, 8, and 9, 2023. Samples were submitted to Pace Analytical Services, LLC in Green Bay, Wisconsin for analysis. The samples were analyzed for volatile organic compounds (VOCs) using SW-846 Method 8260B. The laboratory reported the results under laboratory project number 40260905.

The sample results were assessed using the *USEPA National Functional Guidelines for Organic Superfund Methods Data Review (EPA-540-R-20-005)*, November 2020 and the project-specific quality assurance project plan (QAPP), dated October 2022, Revision 0.

In general, the data are valid as reported and may be used for decision-making purposes. The following issues were noted which have a minor impact on the data usability:

- Select results were reported which were below the lowest calibration standard and quantitation limit (QL); these results were qualified as estimated (J).
- Potential uncertainty exists for the nondetect results for select VOCs in all samples due to continuing calibration nonconformances. These results were qualified as estimated (UJ).
- Samples RM-003XXD, RM-003D, FDUP-001, RM-210D, RM-401XXD, and TB-001 had minor headspace in the vials used for analysis; all results in these samples were qualified as estimated with potential low bias (J/UJ). It should be noted that the positive results for 1,1-dichloroethene in sample RM-210D and trichloroethene in sample RM-401XXD were also qualified as estimated (J) due to detection below the QL; the overall qualification for these compounds in these samples was J.

SAMPLES

Samples included in this review are listed below.

- | | | |
|-----------|-------------|-------------|

¹ Field duplicate of RM-003D

REVIEW ELEMENTS

Sample data were reviewed for the following parameters:

- Agreement of analyses conducted with chain-of-custody (COC) requests
- Data completeness
- Holding times and sample preservation
- Gas chromatography/mass spectrometry (GC/MS) tunes
- Initial and continuing calibrations
- Blanks
- Surrogate spike recoveries
- Matrix spike/matrix spike duplicate (MS/MSD) results
- Laboratory control sample (LCS) results
- Internal standard performance
- Field duplicate results
- Quantitation limits (QLs) and sample results
- Target compound identification

DISCUSSION

Agreement of Analyses Conducted with Chain-of-Custody Requests

Sample reports were checked to verify that the results corresponded to analytical requests as designated on the COC. The samples in this data set were analyzed for VOCs using SW-846 Method 8260B; according to the QAPP, the samples should have been analyzed for VOCs using SW-846 Method 8260D. No validation actions were taken based on this issue.

Data Completeness

The data package was found to be complete as received from the laboratory with the following exceptions.

- The laboratory only spiked a subset of the VOCs which were reported in the samples in the LCS and MS/MSDs. Thus, accuracy and/or precision could not be evaluated for select VOCs. No validation actions were taken on the basis of this issue.
- Select samples were improperly marked for headspace; the laboratory was contacted about this issue and provided a revised report on 06/27/23.

Holding Times and Sample Preservation

All holding time and sample preservation criteria were met with the following exception: samples RM-003XXD, RM-003D, FDUP-001, RM-210D, RM-401XXD, and TB-001 had headspace observed upon receipt by the laboratory. The positive and nondetect results for all VOCs in samples RM-003XXD, RM-003D, FDUP-001, RM-210D, RM-401XXD, and TB-001 were qualified as estimated (J-

/UJ) with a potential low bias due to the headspace. It should be noted that the positive results for 1,1-dichloroethene in sample RM-210D and trichloroethene in sample RM-401XXD were also qualified as estimated (J) due to detection below the QL; the overall qualification for these compounds in these samples was J.

Note that samples were received by the laboratory 9 to 11 days after collection. Samples were stored in coolers, on ice, in a locked former treatment building at the site until delivery to the laboratory. No validation actions were required on this basis since the samples were kept on ice prior to delivery to the laboratory and were received on ice by the laboratory.

GC/MS Tunes

The frequency and abundance of all bromofluorobenzene tunes were within the acceptance criteria.

Initial and Continuing Calibrations

The percent relative standard deviations and relative response factors (RRFs) were within the laboratory acceptance criteria in the initial calibration.

All RRFs were within the acceptance criteria in the continuing calibration (CC). The following table summarizes the percent differences (%Ds) which were outside of the laboratory acceptance criteria in the CC, the associated samples and validation actions.

CC	Analyte	%D	Associated Sample(s)	Validation Actions
40MSV8 04/20/23 @08:57	Acetone	34.8983	All samples in this data set	The nondetect results for the listed VOCs were qualified as estimated (UJ) in the associated samples.
	Chloromethane	-23.4771		
	2-Hexanone	28.4237		
	4-Methyl-2-pentanone (MIBK)	22.9508		

Blanks

Target analytes were not detected in the trip blank or method blank. The following table summarizes the compound that was detected in the field blank and the resulting validation actions.

Blank ID	Compound	Blank Concentration ($\mu\text{g}/\text{L}$)	2x Blank Concentration ($\mu\text{g}/\text{L}$)	QL ($\mu\text{g}/\text{L}$)	Validation Action
FB-001	Toluene	0.40 J	0.8 J	1.0	Qualification was not required since toluene was nondetect in the associated samples.
Associated samples: All samples in this data set					

Surrogate Spike Recoveries

The percent recoveries (%Rs) of the surrogates were within the laboratory acceptance criteria for all samples.

MS/MSD Results

MS/MSD analyses were performed on sample RM-003XXD. All criteria were met.

Note that the laboratory only spiked a subset of the VOCs which were reported in the samples in the MS/MSDs; thus, accuracy and precision could not be evaluated for the following VOCs (which were not spiked) in the MS/MSD analyses: acetone, 2-butanone, 2-hexanone, and 4-methyl-2-pentanone. No validation action was taken on this basis.

LCS Results

An LCS was performed on each day of analysis. All criteria were met.

Note that the laboratory only spiked a subset of the VOCs that were reported in the samples in the LCS. Thus, accuracy could not be evaluated for the following VOCs (which were not spiked) in the LCS analyses: acetone, 2-butanone, 2-hexanone, and 4-methyl-2-pentanone. No validation action was taken on this basis.

Internal Standard Performance

Internal standards were within the method acceptance criteria in all sample analyses.

Field Duplicate Results

The following samples were submitted as the field duplicate pair with this data set:

- RM-003D and FDUP-001

The relative percent difference (RPD) is not applicable for comparison of results if either concentration is <5x the QL; comparison in this case is based on the absolute difference (AbsD) between the results. The acceptance limits for field duplicates in aqueous media is $\leq 30\%$ for the RPD and $< QL$ for the AbsD. For analytes that are detected in one sample and nondetect in the other, the QL is used to represent the nondetect result in the AbsD calculation. The following table summarizes the detected results, the RPD or AbsD values (as applicable) for the detected analytes in each field duplicate pair, and the resulting validation actions. As shown in the table, criteria were met for all detected analytes.

Analyte	QL ($\mu\text{g/L}$)	RM-003D ($\mu\text{g/L}$)	FDUP-001 ($\mu\text{g/L}$)	RPD (%) or AbsD ($\mu\text{g/L}$)	Validation Actions
1,1,1-Trichloroethane	1.0	11.4	11.4	RPD: 0.0	None. All criteria were met.
1,1-Dichloroethane	1.0	6.6	6.6	RPD: 0.0	
1,1-Dichloroethene	1.0	1.1	1.2	AbsD: 0.1	
Trichloroethene	1.0	1.9	2.1	AbsD: 0.2	
cis-1,2-Dichloroethene	1.0	1.8	1.9	AbsD: 0.1	

Criteria: RPD $\leq 30\%$; AbsD $< QL$

Quantitation Limits and Sample Results

Sample calculations were spot-checked; there were no errors noted. No dilutions were performed in the VOC analyses of these samples.

Select results were reported which were below the lowest calibration standard level and QL (or limit of quantitation [LOQ]). These results were qualified as estimated (J) by the laboratory.

The laboratory's limit of detection (LOD) for select VOCs was above one or both of the project action limits specified in the QAPP; the affected VOCs, project action limits, and current laboratory LODs are summarized in the table below.

Analyte	Affected Samples	WAC Chapter NR 140 PAL ($\mu\text{g}/\text{L}$)	WAC Chapter NR 140 ES ($\mu\text{g}/\text{L}$)	Laboratory LOD ($\mu\text{g}/\text{L}$)
1,1,2,2-Tetrachloroethane	All samples in this data set	0.02	0.2	0.38
Bromodichloromethane		0.06	0.6*	0.42
Bromomethane		1	10*	1.2
cis-1,3-Dichloropropene		0.04	0.4*	0.24
trans-1,3-Dichloropropene		0.04	0.4*	0.27
Vinyl chloride		0.02	0.2*	0.17

* Laboratory LOD is below the action limit.

Target Compound Identification

All criteria were met.

Attachment 4

Laboratory Data Qualifiers for Monitoring Wells

QUALIFIERS

Project: 525156.0000PH2 LEMBERGER LF-SE
Pace Project No.: 40260905

DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to dilution of the sample aliquot.

ND - Not Detected at or above LOD.

J - Estimated concentration at or above the LOD and below the LOQ.

LOD - Limit of Detection adjusted for dilution factor, percent moisture, initial weight and final volume.

LOQ - Limit of Quantitation adjusted for dilution factor, percent moisture, initial weight and final volume.

DL - Adjusted Method Detection Limit.

S - Surrogate

1,2-Diphenylhydrazine decomposes to and cannot be separated from Azobenzene using Method 8270. The result for each analyte is a combined concentration.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected at or above the adjusted LOD.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

ANALYTE QUALIFIERS

HS Results are from sample aliquot taken from VOA vial with headspace (air bubble greater than 6 mm diameter).

REPORT OF LABORATORY ANALYSIS

This report shall not be reproduced, except in full,
without the written consent of Pace Analytical Services, LLC.

Summary of Groundwater Standard Exceedances at Plume Monitoring Wells
Lemberger Landfill Sites
1st Quarter 2023

Well ID	Parameter	Result	Data Qualifiers	Units	Standard ¹		Well Location
					ES ²	PAL ³	
RM-401XD	1,1-DICHLOROETHENE	2.3		UG/L		X	400' Northwest of LL Site
RM-401XD	TRICHLOROETHENE	2.2		UG/L		X	400' Northwest of LL Site
RM-401XXD	1,1-DICHLOROETHENE	1.8	j-	UG/L		X	400' Northwest of LL Site
RM-401XXD	TRICHLOROETHENE	0.81	J	UG/L		X	400' Northwest of LL Site
RM-402XD	1,1,1-TRICHLOROETHANE	77.4	j-	UG/L		X	400' Northwest of LTR site
RM-402XD	1,1-DICHLOROETHENE	15.8	j-	UG/L	X		400' Northwest of LTR site
RM-402XD	CIS-1,2-DICHLOROETHENE	14.2	j-	UG/L		X	400' Northwest of LTR site
RM-402XD	TRICHLOROETHENE	10	j-	UG/L	X		400' Northwest of LTR site
RM-402XXD	1,1,1-TRICHLOROETHANE	47.2	j-	UG/L		X	400' Northwest of LTR site
RM-402XXD	1,1-DICHLOROETHENE	5.3	j-	UG/L		X	400' Northwest of LTR site
RM-402XXD	CIS-1,2-DICHLOROETHENE	17.7	j-	UG/L		X	400' Northwest of LTR site
RM-402XXD	TRICHLOROETHENE	12.4	j-	UG/L	X		400' Northwest of LTR site
RM-403XD	1,1,1-TRICHLOROETHANE	58.2		UG/L		X	400' West of LTR site
RM-403XD	1,1-DICHLOROETHENE	6.3		UG/L		X	400' West of LTR site
RM-403XD	TETRACHLOROETHENE	0.56	J	UG/L		X	400' West of LTR site
RM-403XD	TRICHLOROETHENE	7.5		UG/L	X		400' West of LTR site

Notes:

¹ Table includes exceedances where the reported concentration is between the Limit of Detection and Limit of Quantitation ("J" data qualifier).

² ES =Wisconsin Administrative Code NR140 Enforcement Standard

³ PAL =Wisconsin Administrative Code NR140 Preventive Action Limit

⁴ LTR = Lemberger Transport and Recycling

⁵ LL = Lemberger Landfill

Laboratory qualifiers are included in the sample-specific laboratory reports. See laboratory reports for the SDG-specific definitions.

Environmental Monitoring Data Certification

Form 4400-231 (R 5/17)

Notice: Personally identifiable information collected will be used for program administration and enforcement purposes. The Department may also provide this information to requesters as required under Wisconsin's Open Records law, ss. 19.31 to 19.39, Wis. Stats.

When submitting monitoring data, the owner or operator of the facility, practice or activity is required to notify the Department in writing that a groundwater standard or an explosive gas level has been attained or exceeded, as specified in ss. NR 140.24(1)(a); NR 140.26(1)(a); NR 507.30NR 635.14(9)(a); NR 635.18(20) and NR 507.30, Wis. Adm. Code. Failure to report may result in fines, forfeitures or other penalties resulting from enforcement under ss. 289.97, 291.97 or 299.95, Wis. Stats.

Instructions:

- Prepare one form for each license or monitoring ID.
- Please type or print legibly.
- Attach a notification of any values that attain or exceed groundwater standards (that is, preventive action limits, enforcement standards or alternative concentration limits). The notification must include a preliminary analysis of the cause and significance of each value.
- Attach a notification of any gas values that attain or exceed explosive gas levels.
- Send the original signed form, any notification, and Electronic Data Deliverable [EDD] to:

GEMS Data Submittal Contact - WA/5

Monitoring Data Submittal Information

Name of entity submitting data (laboratory, consultant, facility owner)

TRC Environmental Corp.

Contact for questions about data formatting. Include data preparer's name, telephone number and Email address:

Name Meredith Westover	Phone No. (include area code) (608) 358-5035
---------------------------	---

Email

mwestover@trccompanies.com

Facility Name

Lemberger Landfill

License # / Monitoring ID 00753	Facility ID (FID) 436016790
------------------------------------	--------------------------------

Actual sampling dates (e.g., July 2-6, 2003) 1/31, 2/28, 3/31, 4/7-4/9, 2023	The enclosed results are for sampling required in the month(s) of: (e.g., June 2003) January, February, March 2023
---	---

Type of Data Submitted (Check all that apply):

- | | |
|---|--|
| <input checked="" type="checkbox"/> Groundwater monitoring data from monitoring wells | <input type="checkbox"/> Gas monitoring data |
| <input type="checkbox"/> Groundwater monitoring data from private water supply wells | <input type="checkbox"/> Air monitoring data |
| <input checked="" type="checkbox"/> Leachate monitoring data | <input type="checkbox"/> Other (specify): |

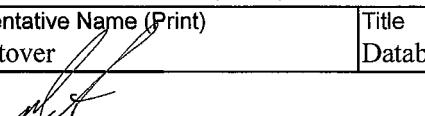

Notification attached?

- | |
|--|
| <input type="checkbox"/> No. No groundwater standards or explosive gas limits were exceeded. |
| <input checked="" type="checkbox"/> Yes, a notification of values exceeding a groundwater standard is attached. It includes a list of monitoring points, dates, sample values, groundwater standard and preliminary analysis of the cause and significance of any concentration. |
| <input type="checkbox"/> Yes, a notification of values exceeding an explosive gas limit is attached. It includes the monitoring points, dates, sample values and explosive gas limits. |

Certification

To the best of my knowledge, the information reported and statements made on this data submittal and attachments are true and correct. Furthermore, I have attached complete notification of any sampling values meeting or exceeding groundwater standards or explosive gas levels, and a preliminary analysis of the cause and significance of concentrations exceeding groundwater standards.
