Subject: MI Cleaners May 10, 2016 status report review comments

Hi Dave, I just finished reviewing this report and have provided comments below. Please give me a call when you have some time. Thanks, Carrie

- Stable or decreasing trends for PERC, could the plume be diving? May need deeper wells
- GW flow to the E/ SE. Depth 6-20'?
- VI is needed on site building, residence at eastern end of Huber Lane and maybe Natural Foods, and possibly the office building and maybe more to the north (PZ-7 > PALS-increasing)
- All wells last sampled in 2014. I would recommend (2) rounds to see where levels are at
- Did the RP scatter dry cleaning waste throughout the Site? I ask because of the GW results->PALS towards Hwy 51 (GP-14 and MW6), >ES to north (MW 5), >ES to the south (many wells)

We are committed to service excellence.

Visit our survey at <http://dnr.wi.gov/customersurvey> to evaluate how I did.
