RE: N.W. MAUTHE SUPERFUND SITE

Semi-Annual Pretreatment Program Compliance Monitoring Status

Dear Ms. Borski:

The Appleton Wastewater Treatment Plant (AWWTP) Pretreatment Program staff visited your facility within the last six months in order to obtain a sample of the wastewater discharged from your site to the sanitary sewer. The AWWTP Pretreatment Program conducts this analysis for compliance monitoring twice, annually for each permitted industry. This outfall sample(s) was tested for process-specific pollutants and Local Limit pollutant parameters identified in your wastewater discharge permit and the sewer use ordinance, Chapter 20, Utilities.

All permitted industries within the Appleton Sewerage District are also required to self-monitor for parameters specified in Part 2 of their wastewater discharge permit. Your facility's self-monitoring compliance data has been received and appears complete for the January through June 2008 reporting period.

Pretreatment compliance monitoring is a required component of the state and federal mandated program implementation. The regulated pollutants analyzed for during the reporting period have been summarized in FORM 13 (attached). This form is the monitoring summary that is submitted to the Wisconsin Department of Natural Resources on a semi-annual basis to reflect all monitoring for the City of Appleton Pretreatment Program.

Your wastestream was compliant for all process-specific pollutants and Local Limit pollutant parameters reported during the monitoring period.

The AWWTP strives to work with permitted industries to stress the importance to maintain compliance within the current framework of environmental regulations. Communication and cooperation between the AWWTP and the industrial sector has and will continue to play a vital role in the success of our Pretreatment Program.

Best regards,

Christopher F. Stempa

Pretreatment & Biosolids Coordinator

RE: N.W. MAUTHE SUPERFUND SITE

Semi-Annual Pretreatment Program Compliance Monitoring Results – July through December 2007

Dear Ms. Borski:

The City of Appleton, Pretreatment Program staff has visited your facility within the last six months to obtain a sample of the wastewater discharged from your site to the sanitary sewer. This outfall sample was tested for process-specific pollutants, identified in your wastewater discharge permit and Local Limit pollutant parameters identified in your discharge permit and the sewer use ordinance, Chapter 20, Utilities.

The City of Appleton, Pretreatment Program conducts this analysis for compliance monitoring twice, annually for each permitted industry. Pretreatment compliance monitoring is a required component of the state and federal mandated program.

Your facility's effluent was analyzed for the pollutants listed in FORM 13 (attached) with sample results indicated. This form is the monitoring summary that is submitted to the Wisconsin Department of Natural Resources on a semi-annual basis to reflect all monitoring for the City of Appleton Pretreatment Program

Your wastestream was compliant for all parameters indicated above for the sample(s) identified on Form 13.

Thank you for accommodating the laboratory staff during these often unannounced visits. This format lends true credibility to our compliance monitoring program and demonstrates the high level of cooperation the City shares with local industries.

Best regards,

Christopher F. Stempa

Pretreatment & Biosolids Coordinator
