Gwen,

The well (MW108) was converted to above-grade protection Thursday. We were at Mauthe this morning for the monthly system sampling and placed a lock on it. We will have to resurvey when we go out to sample on 9/22, but otherwise all good.

Gwen,

To bring you up to date, Westwood is converting the well to above-grade protection, which should be completed today at the latest. Terracon will be stopping by Friday or Monday to place a new lock on the well cover and take some photos.

I talked with Sean after he visited the site this morning. The well is near the very edge of the biofilter "pond" slope. As such, we believe that it could be converted to an above-grade protective cover and continue to be used. Westwood has a pro-top protective cover available that can be used. We don't know the actual timing of the replacement yet. We will continue to be in touch with Westwood through the process.

Bob and Sean Bekx from Westwood replied late yesterday. Sean was going to go out and take a look this morning and let us know. His initial thought was that it would be ok.

Thanks Scott – keep us posted. I sure hope we do not lose a well. Let me know if we need to reach out to Bob at Westwood (OMNNI).

Roxanne,

Just looping you in to this since Gwen is gone if we potentially have to do something here. We were at Mauthe today and noticed work being done in the parking lot to the north. We checked on the well and so far it is intact. Left a voice mail and sent the email below to Bob Givens who the site workers said was the engineer—same guy as last year for the parking lot to the west.

Bob,

Just left you a voice mail about work being done on the Miller Electric Property north of Melvin Street. Like last year in the parking lot to the west, we have a monitoring well in that area (see attached map). It is about 2 feet north of the curb along the north side of the sidewalk. So far the surface has been disturbed around it but the well itself appears to not be disturbed. How deep is that area to be disturbed? What is the grading plan for that area?

Thanks.

Blaine,

This summer we met and talked about the Miller Electric parking lot rehab near the Mauthie site in Appleton. They are planning to be onsite on October 13th to start construction. I know you wanted to stop by during construction to check out some of the monitoring wells. If you need anything from me or Miller, let us know.

They will be starting the parking lot on Melvin St Oct 13th. Can you let the environmentalist know that wanted to be onsite? We had met them when we had the meeting with the city.
