Subject: Schmalz Dump- NER Committee Review Summary

On November 1, 2018, the NER Closure/Peer Review Committee was provided a summary of the status of the Schmalz Dump Superfund Site in Calumet County. This site recently completed a 5yr Review and is in the process of being delisted from the NPL. Results of this meeting included:

- Concurrence that groundwater monitoring can be discontinued and the monitoring wells abandoned. This concurrence was requested for inclusion in a Technical Memo to EPA requesting approval of these actions.
- CO/ICs will be added to BRRTS per September 2018 ESD.
- Historic Fill Exemption will be needed for development.

This email will be added to the case file for future reference.
