Good morning Giang-Van,

Curious if you've had a chance to discuss the potential for either doing more work at Schmalz, or calling for no more action.

If you recall, the DNR spent a little money to sample and re-sample one well (MW-5) at the site, where one ES exceedance remains for total Cr. Going back to 2023, we had discussed the EPA potentially finding some grant money to do additional work, if you felt it was needed. The DNR at this point is not willing to spend additional funds.

The city and county are still interested in putting this property use, so long as they are not taking on any additional liability.

I attached the sample results, tho I'm sure you have them because they went into the FYR.

Please let me know where you stand on this case.

Thanks,
BJ
