Subject: RE: Former WPS Green Bay, WI MGP - Revised PDI Work Plan

Hi Sarah R

Thanks for the opportunity to review and comment. I did a quick review of Rev 1. Concerns remain on data gaps and degree & extent issues raised in the agency's comments. Conditioned on EPA approval and compliance with permitting and local approvals, DNR would not object with the PDI work proceeding as scheduled.

Bill

Good afternoon Bill,

I am just catching up on emails, since I was out for travel last week for several days. I am also quickly reviewing this document. When you have a chance, can you let me know your planned turn around time? My apologies for the short notice, but it appears they are planning to start next drilling next Monday.

Thanks,
Sarah

Ms. Rolfes,

On behalf of Frank Dombrowski, please find attached a letter response to USEPA comments received on May 29, 2020, on the Pre-Design Investigation Work Plan. The letter, which also incorporates Revision 1 of the work plan, is being submitted per the proposed schedule submitted by email on August 8, 2020. A second attachment of the revised work plan text has been provided in red-line strike-out to facilitate review of the document changes.

If you have any questions, please don't hesitate to contact Frank at (414) 221-2156 or reach out to me if an alternative method of file delivery is needed.

Kind regards

Staci Goetz
