**Subject: Submittal Received Without Appropriate Fee for Review  
National Presto  
WDNR BRRTS #: 02-09-000267**

Dear Mr. Paul:

The Department hereby acknowledges receipt of the report titled, "Remedial Action Report" on October 30, 2018. This report, dated October 29, 2018 was provided on your behalf by Gannett Fleming, Inc. The submittal will be tracked in our Bureau for Remediation and Redevelopment Tracking System (BRRTS) which can be viewed on the web at <http://dnr.wi.gov/botw/SetUpBasicSearchForm.do>.

**Please be aware that since 1998, the RR Program has implemented a legislative directive to collect fees to support certain oversight activities.** If you request Department review and response to this document, a fee must be provided, as specified in ch. NR 749, Wis. Adm. Code. We encourage you to submit the applicable fee for this submittal to allow us to conduct a thorough review and provide you with a response. By formally providing input to you and your consultant, Department staff may help ensure that alternate approaches are considered, that work conducted will be acceptable, and that your remedial actions are implemented in a timely manner.

For this submittal, the appropriate fees would be \$1,050.00 for review of a ch. 724 Remedial Design Report, plus \$650 in database fees for sites with residual soil and groundwater contamination. After receipt of the specified fees, the Department will review this document and respond. For more information on receiving written Department assistance, please see our webpage at: <http://dnr.wi.gov/topic/Brownfields/Fees.html>.

If you have any questions regarding this letter, please call me at 715-839-3748.

Sincerely,

Mae Willkom  
Hydrogeologist  
Remediation and Redevelopment Program
