FYI,

To the Team – the email string below is an update from the Lab.

Sounds like early next week.

Dave,

Got an update from the lab. All of your workorders are to be included in today's/tonight's injection sequence on the instrument. If all goes well, data will be reported to you over the next couple of days, Monday at the latest.

I know this isn't hard and fast information, but I will keep you posted.

Best Regards,

Jennifer Miller

Hello Dave,

I apologize for not getting back to you yesterday. We will get an update from the LC-MS/MS lab later this a.m. (PST time) and then I'll be able to hopefully tell you a bit more about a projected delivery schedule.

Thank you for your patience.

Best Regards,

Jennifer Miller

Hi Dave,

Your Vista WO#s are: 1801578
1801767
1801971, 972 and 973

I will have details to you tomorrow about their status. We are hoping to have an instrument back up and running tonight. Thanks for your patience.

Dan – no hold time issues, just % recovery issues when compared with the lab standards.

Thanks for the update Dave. Are there any issues with the hold time?

Team,

A quick update. We have three sets of samples at the Lab for analysis.

The first set: GW sampling for the first five wells at Newton Pit – LAB ID 1801578

The second set: Drilling samples for field and equipment blanks for well installation activities at Newton and Mirro - LAB ID 1801767

The third set: GW sampling, 2-wells Newton, 6-wells Mirro – Lab IDs 1801971, 1801972, 1801973

I this morning I received the email below notifying us that our lab results for the Second Set of samples (Drilling samples LAB ID 1801767) will be delayed due to equipment problems at the lab. See the email below.

Therefore, I called the lab and checked on our first set of results (1st five GW samples from Newton Pit). They said that they had the preliminary results but that some of the samples would have to be re-run to meet data quality parameters – and they cannot rerun them until their equipment is fixed. I asked if they could send me the draft/preliminary results.

I'll keep all up-to-date as I hear more.

Thanks

Good morning,

I wanted to give you a heads-up that our PFAS Isotope Dilution instrument is currently experiencing problems, and there will be a delay in reporting this workorder. We have an engineer in currently to troubleshoot the instrument and will hopefully be up and running shortly; apologies for any inconvenience this may cause.

Best,

Jade White

Mr. Henderson,

Attached is the sample acknowledgement letter for workorder 1801767. These samples will be analyzed for the list of 24 analytes using PFAS Isotope Dilution Method. Please contact us if you would like any changes.

Thank you!
