Dave,

Yes that makes sense continue to submit status reports to Dave Haas. However, you should notify the wastewater program when you begin discharging from the pond to Silver Creek then we will generate monthly electronic discharge monitoring reports for the discharge to the creek. This permit was recently reissued and requires electronic reporting of discharge monitoring results to the department instead of a paper annual report as required in the previous permit.

Please contact me if you have any questions.

Thanks,

Trevor Moen

Subject: RE: eDMR Submittal Reminder - Former Newton Gravel Pit

Trevor & David, w/ cc to Tauren and the Gravel Pit team,

Just a quick reply – since I'm doing the monitoring and the DMRs.

The Newton Pit site presents a little different pathway for WPDES discharge monitoring than the typical site. In our WPDES discharge management/sampling plan we had an initial requirement to monitor the treatment pond water prior to beginning discharge. In general, our management/sample plan said we'd monitor until the pond water met the discharge limits, then we'd submit those results for David's review prior to beginning discharge.

At this time, we've not begun discharging from the treatment pond.

We've been monitoring the pond for about a year now and we're getting consistent results below discharge limits. BUT, in the last few months it's been determined that there is a possibility that we may have emerging contaminant compounds in the pond. Therefore, in conversations with our WDNR R&R PM (Tauren) we've informally agreed not to discharge from the pond yet.

I'm about to begin working on an annual WPDES report for submittal to David. In that report I'll present the analytical results and an update on the operational status of the pond.

Additionally, we will be sampling the treatment pond for emerging contaminants in two weeks and I'll be including those results with the annual WPDES report.

Hope that all makes sense and meets the Department's expectations. Let me know if you have any questions prior to the annual report submittal.

Thanks
dsh

Subject: eDMR Submittal Reminder - Former Newton Gravel Pit

Hello Dan,

This is a reminder email that electronic Discharge Monitoring Reports (eDMRs) have not been submitted for the months of July, August, and September 2018 under the Contaminated Groundwater from Remedial Action Operations General Permit (WI-0046566-07-0) for the discharge from the Former Newton Gravel Pit (Site ID 60047) located at 3130 Hecker Rd, Manitowoc, Wisconsin. The eDMRs shall be submitted to the Department regardless if there is a discharge or not during any month. The eDMR can be accessed through DNR Switchboard (<http://dnr.wi.gov/topic/switchboard/index.html>) using Internet Explorer. Other browsers such as Safari, Firefox, and Google Chrome may not work with the Switchboard. In order to access the eDMR forms, you must have or create a Wisconsin Web Access Management System (WAMS) ID and request access for each facility for which you intend to submit data. If you already have a WAMS ID, then you do not need to recreate one to access the eDMR. The eDMRs are due 21 days following the end of each month. Please refer to the Reissuance Letter dated June 29, 2018 (attached) for more information.

Please contact me or Dave Haas (copied above) if you have any questions.

Thank you,

Trevor Moen
