Tauren,

Thank you – we'll make sure the "2017 DNR sampled wells" are included in the expanded work plan.

Subject: RE: Former Newton Pit - Expanded Potable Well Sampling WP

Hi Dave,

I have the following comment for the work plan:

- It is unclear if the property owners who were sampled by DNR at the end of 2017 who did not have detections above NR 140 standards are included in the work plan for this sample effort. These are indicated on Figure 1A by six yellow dots along S. 26th Street, Nelson Lane, and Elm Road. These property owners should be included for sampling since it has been over a year since they were last sampled and are in the area where the more recent detections in private wells were found.

Additional correspondence from DNR will be provided at a later date regarding work planning for PFAS on the gravel pit site and off-site. For statewide consistency, any correspondence regarding PFAS is being reviewed by specific DNR staff in Madison. Based on their work load, the earliest you may see this additional correspondence is next week, but I wanted to at least get the above comment for the work plan out to you within a reasonable period of time.

Regards,

We are committed to service excellence.

Visit our survey at <http://dnr.wi.gov/customersurvey> to evaluate how I did.

Tauren & Jim,

Attached is the Expanded Downgradient Potable Well Sampling Work Plan – VOCs for the Former Newton Pit project. The report is also being submitted through the WDNR's electronic submittal system.

Please let me know if you have any questions.

Thanks

dsh
