Re: Laboratory Results for Water Samples Collected from PW-16 in May and August 2018

Dear Ms. Shan:

On May 9, 2018, Gannett Fleming, Inc. collected a water sample from your home at 5535 Wild Rose Lane. The sample was collected as a follow-up to the water samples collected from your home in September and October 2014, June 2015, and May 2016 and 2017 and in conjunction with on-going groundwater monitoring and remedial activities associated with the WRR Environmental Services facility on Ryder Road. The monitoring and remedial activities at the WRR site are being conducted under the oversight of the Wisconsin Department of Natural Resources (WDNR).

Our designation for your water sample is PW-16. The water sample collected from your home in May was sent to ALS Environmental Laboratory in Holland, Michigan, for analysis of 51 individual volatile organic compounds (VOCs). Only one VOC was detected in the sample: acetone at 1.5 micrograms per liter ($\mu\text{g}/\ell$), which is equivalent to 1.5 parts per billion (ppb). The state and federal drinking water standard for acetone is 9,000 ppb, so the concentration detected in the water sample was far below that value. Acetone was also detected at 1.7 ppb in the trip blank that accompanied the May 2018 sample. The trip blank is prepared in the laboratory using laboratory-grade distilled water and accompanies the sample containers from the lab when they are shipped to the field and then again when the filled sample containers are shipped back to the lab. The trip blank also contained 1.1 ppb of methylene chloride. The compounds detected in the May sample from PW-16 and the trip blank are used to clean glassware and are not indicative of the water quality in your well.

To determine if the compounds detected in PW-16 and the trip blank in May 2018 were due to laboratory contamination, Gannett Fleming collected another sample from your well on August 15, 2018. That sample and a trip blank were submitted to a different laboratory, Pace Analytical Laboratory of Green Bay, for VOC analyses. The sample collected from PW-16 only contained one compound, chloromethane. Chloromethane was once widely used as a refrigerant; however, it is no longer used in consumer products. The concentration of chloromethane measured in the sample collected from PW-16 in August (3.0 ppb) is far below its state and federal drinking water standard of 30 ppb. No other VOCs were detected in the August 2018 water sample collected from PW-11 or the trip blank that accompanied it.

-2-

Taken collectively, we believe that the acetone and chloromethane detected in the PW-16 samples in May and August 2018, respectively, are likely due to laboratory contamination and not indicative of the water in your well. Enclosed are copies of the laboratory reports for the water samples collected from your home (PW-16) in May and August 2018.

A copy of this letter and the May and August 2018 lab reports are being sent to the WDNR for its records. We thank you for your cooperation. Someone from Gannett Fleming will contact you next spring to schedule a time convenient for you for us to collect the next sample. In the meantime, if you have any questions regarding the analytical results of the samples collected in May and August 2018, please call me at the number listed below.

Sincerely,

GANNETT FLEMING, INC.

Re: **WRR (55929.005)**

Work Order: **1805782**

Dear Anthony,

Revision: **1**

ALS Environmental received 2 samples on 11-May-2018 for the analyses presented in the following report.

The analytical data provided relates directly to the samples received by ALS Environmental - Holland and for only the analyses requested.

Sample results are compliant with industry accepted practices and Quality Control results achieved laboratory specifications. Any exceptions are noted in the Case Narrative, or noted with qualifiers in the report or QC batch information. Should this laboratory report need to be reproduced, it should be reproduced in full unless written approval has been obtained from ALS Environmental. Samples will be disposed in 30 days unless storage arrangements are made.

The total number of pages in this report is 18.

If you have any questions regarding this report, please feel free to contact me:

ADDRESS: 3352 128th Avenue, Holland, MI, USA

**QUALIFIERS,
ACRONYMS, UNITS**

<u>Qualifier</u>	<u>Description</u>
*	Value exceeds Regulatory Limit
**	Estimated Value
a	Analyte is non-accredited
B	Analyte detected in the associated Method Blank above the Reporting Limit
E	Value above quantitation range
H	Analyzed outside of Holding Time
J	Analyte is present at an estimated concentration between the MDL and Report Limit
ND	Not Detected at the Reporting Limit
O	Sample amount is > 4 times amount spiked
P	Dual Column results percent difference > 40%
R	RPD above laboratory control limit
S	Spike Recovery outside laboratory control limits
U	Analyzed but not detected above the MDL
X	Analyte was detected in the Method Blank between the MDL and Reporting Limit, sample results may exhibit background or reagent contamination at the observed level.

<u>Acronym</u>	<u>Description</u>
DUP	Method Duplicate
LCS	Laboratory Control Sample
LCSD	Laboratory Control Sample Duplicate
LOD	Limit of Detection (see MDL)
LOQ	Limit of Quantitation (see PQL)
MBLK	Method Blank
MDL	Method Detection Limit
MS	Matrix Spike
MSD	Matrix Spike Duplicate
PQL	Practical Quantitation Limit
RPD	Relative Percent Difference
TDL	Target Detection Limit
TNTC	Too Numerous To Count
A	APHA Standard Methods
D	ASTM
E	EPA
SW	SW-846 Update III

<u>Units Reported</u>	<u>Description</u>
µg/L	Micrograms per Liter

Work Order: 1805782

Case Narrative

Samples for the above noted Work Order were received on 05/11/18. The attached "Sample Receipt Checklist" documents the status of custody seals, container integrity, preservation, and temperature compliance.

Samples were analyzed according to the analytical methodology previously transmitted in the "Work Order Acknowledgement". Methodologies are also documented in the "Analytical Result" section for each sample. Quality control results are listed in the "QC Report" section. Sample association for the reported quality control is located at the end of each batch summary. If applicable, results are appropriately qualified in the Analytical Result and QC Report sections. The "Qualifiers" section documents the various qualifiers, units, and acronyms utilized in reporting. A copy of the laboratory's scope of accreditation is available upon request.

With the following exceptions, all sample analyses achieved analytical criteria.

Volatile Organics:

No deviations or anomalies were noted.

RE: Project: 55929.005 WRR-PW-16
Pace Project No.: 40174239

Dear Tony Miller:

Enclosed are the analytical results for sample(s) received by the laboratory on August 17, 2018. The results relate only to the samples included in this report. Results reported herein conform to the most current, applicable TNI/NELAC standards and the laboratory's Quality Assurance Manual, where applicable, unless otherwise noted in the body of the report.

Revised Report: The Project ID has been corrected.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Dan Milewsky

QUALIFIERS

Project: 55929.005 WRR-PW-16

Pace Project No.: 40174239

DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to dilution of the sample aliquot.

ND - Not Detected at or above LOD.

J - Estimated concentration at or above the LOD and below the LOQ.

LOD - Limit of Detection adjusted for dilution factor and percent moisture.

LOQ - Limit of Quantitation adjusted for dilution factor and percent moisture.

S - Surrogate

1,2-Diphenylhydrazine decomposes to and cannot be separated from Azobenzene using Method 8270. The result for each analyte is a combined concentration.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected at or above the adjusted LOD.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

Excellence Delivered As Promised

August 30, 2018

File #55929.005

Mr. Timothy Hauge
5699 South Lowes Creek Road
Eau Claire, WI 54701

Re: Laboratory Results for Water Samples Collected from PW-11 in May and August 2018

Dear Mr. Hauge:

On May 9, 2018, Gannett Fleming, Inc. collected a water sample from your home at 5699 South Lowes Creek Road. The sample was collected as a follow-up to the water samples collected from your home in September and October 2014, June 2015, and May 2016 and 2017 and in conjunction with on-going groundwater monitoring and remedial activities associated with the WRR Environmental Services facility on Ryder Road. The monitoring and remedial activities at the WRR site are being conducted under the oversight of the Wisconsin Department of Natural Resources (WDNR).

Our designation for your water sample is PW-11. The water sample collected from your home in May was sent to ALS Environmental Laboratory in Holland, Michigan, for analysis of 51 individual volatile organic compounds (VOCs). Only one VOC was detected in the sample: acetone at 6.6 micrograms per liter ($\mu\text{g}/\ell$), which is equivalent to 6.6 parts per billion (ppb). The state and federal drinking water standard for acetone is 9,000 ppb, so the concentration detected in the water sample was far below that value. Another compound, methylene chloride, was detected in the trip blank that accompanied the May 2018 sample. The trip blank is prepared in the laboratory using laboratory-grade distilled water and accompanies the sample containers from the lab when they are shipped to the field and then again when the filled sample containers are shipped back to the lab. The compounds detected in the May sample from PW-11 and the trip blank are used to clean glassware and are not indicative of the water quality in your well.

To determine if the compounds detected in PW-11 and the trip blank in May 2018 were due to laboratory contamination, Gannett Fleming collected another sample from your well on August 15, 2018. That sample and a trip blank were submitted to a different laboratory, Pace Analytical Laboratory of Green Bay, for VOC analyses. The sample collected from PW-11 only contained one compound, chloromethane. Chloromethane was once widely used as a refrigerant; however, it is no longer used in consumer products. The concentration of chloromethane measured in the sample collected from PW-11 in August (2.2 ppb) is far below its state and federal drinking water standard of 30 ppb. No other VOCs were detected in the August 2018 water sample collected from PW-11 or the trip blank that accompanied it.

August 30, 2018

-2-

Taken collectively, we believe that the acetone and chloromethane detected in the PW-11 samples in May and August 2018, respectively, are likely due to laboratory contamination and not indicative of the water in your well. Enclosed are copies of the laboratory reports for the water samples collected from your home (PW-11) in May and August 2018.

A copy of this letter and the May and August 2018 lab reports are being sent to the WDNR for its records. We thank you for your cooperation. Someone from Gannett Fleming will contact you next spring to schedule a time convenient for you for us to collect the next sample. In the meantime, if you have any questions regarding the analytical results of the samples collected in May and August 2018, please call me at the number listed below.

Sincerely,

GANNETT FLEMING, INC.

Re: **WRR (55929.005)**

Work Order: **1805783**

Dear Anthony,

Revision: **1**

ALS Environmental received 2 samples on 11-May-2018 for the analyses presented in the following report.

The analytical data provided relates directly to the samples received by ALS Environmental - Holland and for only the analyses requested.

Sample results are compliant with industry accepted practices and Quality Control results achieved laboratory specifications. Any exceptions are noted in the Case Narrative, or noted with qualifiers in the report or QC batch information. Should this laboratory report need to be reproduced, it should be reproduced in full unless written approval has been obtained from ALS Environmental. Samples will be disposed in 30 days unless storage arrangements are made.

The total number of pages in this report is 18.

If you have any questions regarding this report, please feel free to contact me:

ADDRESS: 3352 128th Avenue, Holland, MI, USA

**QUALIFIERS,
ACRONYMS, UNITS**

<u>Qualifier</u>	<u>Description</u>
*	Value exceeds Regulatory Limit
**	Estimated Value
a	Analyte is non-accredited
B	Analyte detected in the associated Method Blank above the Reporting Limit
E	Value above quantitation range
H	Analyzed outside of Holding Time
J	Analyte is present at an estimated concentration between the MDL and Report Limit
ND	Not Detected at the Reporting Limit
O	Sample amount is > 4 times amount spiked
P	Dual Column results percent difference > 40%
R	RPD above laboratory control limit
S	Spike Recovery outside laboratory control limits
U	Analyzed but not detected above the MDL
X	Analyte was detected in the Method Blank between the MDL and Reporting Limit, sample results may exhibit background or reagent contamination at the observed level.

<u>Acronym</u>	<u>Description</u>
DUP	Method Duplicate
LCS	Laboratory Control Sample
LCSD	Laboratory Control Sample Duplicate
LOD	Limit of Detection (see MDL)

Case Narrative

Samples for the above noted Work Order were received on 05/11/18. The attached "Sample Receipt Checklist" documents the status of custody seals, container integrity, preservation, and temperature compliance.

Samples were analyzed according to the analytical methodology previously transmitted in the "Work Order Acknowledgement". Methodologies are also documented in the "Analytical Result" section for each sample. Quality control results are listed in the "QC Report" section. Sample association for the reported quality control is located at the end of each batch summary. If applicable, results are appropriately qualified in the Analytical Result and QC Report sections. The "Qualifiers" section documents the various qualifiers, units, and acronyms utilized in reporting. A copy of the laboratory's scope of accreditation is available upon request.

With the following exceptions, all sample analyses achieved analytical criteria.

Volatile Organics:

No deviations or anomalies were noted.

RE: Project: 55929.005 WRR-PW-11
Pace Project No.: 40174236

Dear Tony Miller:

Enclosed are the analytical results for sample(s) received by the laboratory on August 17, 2018. The results relate only to the samples included in this report. Results reported herein conform to the most current, applicable TNI/NELAC standards and the laboratory's Quality Assurance Manual, where applicable, unless otherwise noted in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Dan Milewsky

QUALIFIERS

Project: 55929.005 WRR-PW-11
Pace Project No.: 40174236

DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to dilution of the sample aliquot.

ND - Not Detected at or above LOD.

J - Estimated concentration at or above the LOD and below the LOQ.

LOD - Limit of Detection adjusted for dilution factor and percent moisture.

LOQ - Limit of Quantitation adjusted for dilution factor and percent moisture.

S - Surrogate

1,2-Diphenylhydrazine decomposes to and cannot be separated from Azobenzene using Method 8270. The result for each analyte is a combined concentration.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected at or above the adjusted LOD.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.
