Re: Laboratory Results for Water Samples Collected from PW-16 in May 2019

Dear Ms. Shan:

On May 22, 2019, Gannett Fleming, Inc. collected a water sample from your home at 5535 Wild Rose Lane. The sample was collected as a follow-up to the water samples collected from your home in September and October 2014; June 2015; and May 2016, 2017, and 2018; and August 2018 in conjunction with on-going groundwater monitoring and remedial activities associated with the WRR Environmental Services facility on Ryder Road. The monitoring and remedial activities at the WRR site are being conducted under the oversight of the Wisconsin Department of Natural Resources (WDNR).

Our designation for your water sample is PW-16. The water sample collected from your home in May was sent to ALS Environmental Laboratory in Holland, Michigan, for analysis of 65 individual volatile organic compounds (VOCs). Only one VOC was detected in the sample: chloroform at 7.8 micrograms per liter ( $\mu\text{g/l}$ ), which is equivalent to 7.8 parts per billion (ppb). Chloroform is a byproduct of the chlorination of wells and drinking water. The state enforcement water standard for chloroform is 6 ppb, and the state and federal drinking water standard for a group of chemicals chloroform is part of is 100 ppb in chlorinated municipal drinking water supplies. Chloroform was also detected at 0.67 ppb in the trip blank that accompanied the May 2019 sample. The trip blank is prepared in the laboratory using laboratory-grade distilled water and accompanies the sample containers from the lab when they are shipped to the field and then again when the filled sample containers are shipped back to the lab. Chloroform was not measured above the state preventative action limit of 0.6 ppb in any of the groundwater samples collected in May 2019 from off-site monitoring wells located between WRR and your well, so we do not believe the chloroform detected in your well is associated with WRR.

Enclosed is a copy of the laboratory report for the water sample collected from your home (PW-16) in May 2019. A copy of this letter and the lab report are being sent to the WDNR for its records. We thank you for your cooperation. Someone from Gannett Fleming will contact you

Re: **WRR (55929.005)**

Work Order: **19051721**

Dear Anthony,

ALS Environmental received 2 samples on 24-May-2019 for the analyses presented in the following report.

The analytical data provided relates directly to the samples received by ALS Environmental - Holland and for only the analyses requested.

Sample results are compliant with industry accepted practices and Quality Control results achieved laboratory specifications. Any exceptions are noted in the Case Narrative, or noted with qualifiers in the report or QC batch information. Should this laboratory report need to be reproduced, it should be reproduced in full unless written approval has been obtained from ALS Environmental. Samples will be disposed in 30 days unless storage arrangements are made.

The total number of pages in this report is 18.

If you have any questions regarding this report, please feel free to contact me:

ADDRESS: 3352 128th Avenue, Holland, MI, USA

**Case Narrative**

Samples for the above noted Work Order were received on 05/24/19. The attached "Sample Receipt Checklist" documents the status of custody seals, container integrity, sample condition, preservation, and temperature compliance.

In order to ensure compliance with NR 149 criteria, please note the following report format:

- (1) The Limit of Detection (LOD) is reported as the MDL (Method Detection Limit)
- (2) The Limit of Quantitation (LOQ) is reported as the PQL (Practical Quantitation Limit)
- (3) All reported concentrations, including those for the LOD and LOQ, are adjusted for any required dilutions
- (4) All reported concentrations, including those for the LOD and LOQ, are adjusted for moisture content when samples are reported on a dry weight basis.

Samples were analyzed according to the analytical methodology previously documented in the "Work Order Acknowledgement". Methodologies are also documented in the "Analytical Result" section for each sample. Quality control results are listed in the "QC Report" section. Detail as to the associated samples can be found at the end of each batch summary. If applicable, results are appropriately qualified in the Analytical Result and QC Report sections. The "Qualifiers" section documents the various qualifiers, acronyms, and units utilized in reporting.

With the following exceptions, all sample analyses achieved analytical criteria.

**Volatile Organics:**

Batch R261663a, Method WI\_VOC\_8260\_W, Sample VLCSW3-190530: The VOC LCS recovery was above the upper control limit. All the sample results in the batch were non-detect. No qualification is necessary for Bromomethane.

Batch R261787b, Method WI\_VOC\_8260\_W, Sample 19051721-01A: The VOC Continuing Calibration Verification did not meet method acceptance criteria for the following analytes, results are to be considered estimated for Dichlorodifluoromethane.

Batch R261787b, Method WI\_VOC\_8260\_W, Sample 19051721-02A: The VOC Continuing Calibration Verification did not meet method acceptance criteria for the following analytes, results are to be considered estimated for Dichlorodifluoromethane.

File #55929.005

Mr. Timothy Hauge  
5699 South Lowes Creek Road  
Eau Claire, WI 54701

Re: Laboratory Results for Water Samples Collected from PW-11 in May 2019

Dear Mr. Hauge:

On May 22, 2019, Gannett Fleming, Inc. collected a water sample from your home at 5699 South Lowes Creek Road. The sample was collected as a follow-up to the water samples collected from your home in September and October 2014; June 2015; May 2016, 2017, and 2018; and August 2018 in conjunction with on-going groundwater monitoring and remedial activities associated with the WRR Environmental Services facility on Ryder Road. The monitoring and remedial activities at the WRR site are being conducted under the oversight of the Wisconsin Department of Natural Resources (WDNR).

Our designation for your water sample is PW-11. The water sample collected from your home in May was sent to ALS Environmental Laboratory in Holland, Michigan, for analysis of 65 individual volatile organic compounds (VOCs). No VOCs were detected in the water sample collected from your home in May 2019.

The trip blank, which accompanied the May 2019 sample from your home, contained a trace of chloroform at a concentration of 0.62 micrograms per liter ( $\mu\text{g}/\ell$ ), which is equivalent to 0.62 parts per billion (ppb), far below its WDNR groundwater enforcement standard of 6 ppb. The chloroform detected in the May trip blank is the result of laboratory contamination and not indicative of the water quality in your well. Enclosed is a copy of the laboratory report for the water sample collected from your home (PW-11) on May 22, 2019.

A copy of this letter and the May 2019 lab report is being sent to the WDNR for its records. We thank you for your cooperation. Someone from Gannett Fleming will contact you next spring to schedule a time for us to collect the next sample that's convenient for you. In the meantime, if

Re: **WRR (55929.005)**

Work Order: **19051722**

Dear Anthony,

ALS Environmental received 2 samples on 24-May-2019 for the analyses presented in the following report.

The analytical data provided relates directly to the samples received by ALS Environmental - Holland and for only the analyses requested.

Sample results are compliant with industry accepted practices and Quality Control results achieved laboratory specifications. Any exceptions are noted in the Case Narrative, or noted with qualifiers in the report or QC batch information. Should this laboratory report need to be reproduced, it should be reproduced in full unless written approval has been obtained from ALS Environmental. Samples will be disposed in 30 days unless storage arrangements are made.

The total number of pages in this report is 18.

If you have any questions regarding this report, please feel free to contact me:

ADDRESS: 3352 128th Avenue, Holland, MI, USA

**Work Order:** 19051722

**Case Narrative**

Samples for the above noted Work Order were received on 05/24/19. The attached "Sample Receipt Checklist" documents the status of custody seals, container integrity, sample condition, preservation, and temperature compliance.

In order to ensure compliance with NR 149 criteria, please note the following report format:

- (1) The Limit of Detection (LOD) is reported as the MDL (Method Detection Limit)
- (2) The Limit of Quantitation (LOQ) is reported as the PQL (Practical Quantitation Limit)
- (3) All reported concentrations, including those for the LOD and LOQ, are adjusted for any required dilutions
- (4) All reported concentrations, including those for the LOD and LOQ, are adjusted for moisture content when samples are reported on a dry weight basis.

Samples were analyzed according to the analytical methodology previously documented in the "Work Order Acknowledgement". Methodologies are also documented in the "Analytical Result" section for each sample. Quality control results are listed in the "QC Report" section. Detail as to the associated samples can be found at the end of each batch summary. If applicable, results are appropriately qualified in the Analytical Result and QC Report sections. The "Qualifiers" section documents the various qualifiers, acronyms, and units utilized in reporting.

With the following exceptions, all sample analyses achieved analytical criteria.

**Volatile Organics:**

Batch R261663a, Method WI\_VOC\_8260\_W, Sample VLCSW3-190530: The VOC LCS recovery was above the upper control limit. All the sample results in the batch were non-detect. No qualification is necessary for Bromomethane.

Batch R261787b, Method WI\_VOC\_8260\_W, Sample 19051722-01A: The VOC Continuing Calibration Verification did not meet method acceptance criteria for the following analytes, results are to be considered estimated for Dichlorodifluoromethane.

Batch R261787b, Method WI\_VOC\_8260\_W, Sample 19051722-02A: The VOC Continuing Calibration Verification did not meet method acceptance criteria for the following analytes, results are to be considered estimated for Dichlorodifluoromethane.
