Subject: Variance for Extension of Temporary Emergency Water under Wis. Admin Code § NR 738.14

Dear Mr. and Ms. Snapp:

The Wisconsin Department of Natural Resources (DNR) is granting a variance under Wisconsin Administrative (Wis. Admin.) Code § NR 738.14 to authorize the extension of temporary emergency water provided to you at the property located at 211 W Cook St. Temporary emergency water was provided to your property under Wis. Admin. Code § NR 735.06(1) for an initial six-month period. This variance extends the provision of temporary emergency water as funding allows, or until such time as the DNR confirms one or more of the following has occurred:

- (1) follow-up laboratory analysis verifies that well water samples do not contain contaminants above maximum levels set forth in Wis. Admin. Code chs. 140 and 809, or above the Department of Health Services' (DHS) recommended enforcement standards;
- (2) the contaminated water supply has been replaced by an uncontaminated water supply; and/or
- (3) the private water supply has returned to an uncontaminated condition, whichever occurs first.

If subsequent sample results confirm any of the above situations, the DNR will no longer provide temporary emergency water supplies.

In order to continue providing emergency water supplies, the DNR is requesting an updated temporary water agreement, which is included in this envelope. You may scan and e-mail the document to [Adrian.Herrera@wisconsin.gov](mailto:Adrian.Herrera@wisconsin.gov) or return via the included return envelope.

If you wish to cancel this agreement and stop receiving temporary emergency water supplies, or if you have any questions, please contact Jenna Soyer at [jenna.soyer@wisconsin.gov](mailto:jenna.soyer@wisconsin.gov) or 608-354-8629.

Sincerely,

Christine Haag  
Director  
Remediation and Redevelopment Program

## Agreement for Requesting Temporary Emergency Water

The Wisconsin Department of Natural Resources (DNR) determined that your well is adversely affected by contamination from environmental pollution or a hazardous substance discharge based on sample results received by the DNR. Based on the information available at this time, the DNR determined you to be eligible to receive a temporary supply of drinking water from the DNR under Wisconsin Administrative Code (Wis. Admin. Code) ch. NR 738. To continue to receive a temporary supply of drinking water, the DNR is requesting an updated agreement with the DNR.

This agreement requires that you be responsible for the proper maintenance of any physical equipment provided as part of the temporary emergency water supply. A third-party contractor will continue to provide the temporary supply of emergency water and the DNR will pay for this service and the required deposit.

The temporary emergency water supply is available until such time as the DNR confirms one or more of the following has occurred, whichever occurs first:

- 1) Results of laboratory analysis confirm that well water does not contain contaminants above maximum levels set forth in Wis. Adm. Code chs. 140 and 809, or above DHS recommended enforcement standards;
- 2) The contaminated water supply has been replaced by an uncontaminated water supply; and/or
- 3) The private water supply has returned to an uncontaminated condition.

If well sample results confirm any of the above, the DNR will no longer provide a temporary emergency water supply.

By signing below, you acknowledge entering into an agreement with the DNR, and you agree to:

- 1) take responsibility for the proper maintenance of any physical equipment constructed or provided to you by the third-party contractor for your use as part of the temporary water supply;
- 2) allow the DNR reasonable access to take private water samples during the period of time that the DNR is providing temporary water; and
- 3) agree to indemnify and hold harmless the DNR for any damage that may occur to the physical equipment provided to you for your use as part of the temporary water supply while the equipment is in your possession.

If you have questions about this agreement, contact Jenna Soyer, DNR Remediation and Redevelopment Program, at [Jenna.Soyer@Wisconsin.gov](mailto:Jenna.Soyer@Wisconsin.gov), or by phone at (608) 354-8629.
