Subject: Work Plan for ELUC Evaluation & Extinguishment – former Kenosha Engine Plant  
Chrysler Kenosha Main Plt, 5555 30<sup>th</sup> Avenue, Kenosha  
DNR BRRTS Activity # 02-30-000327; FID # 230004500

Dear Mr. Boldt:

The Department of Natural Resources (DNR) reviewed the *Work Plan for ELUC Evaluation & Extinguishment* (April 10, 2023) (the Plan) prepared on your behalf by AECOM for the Chrysler Kenosha Main Plt site. The Plan proposes collecting soil and groundwater samples to determine the distribution of PCBs within a portion of the site where an environmental land use control (ELUC) is in effect. The ELUC limits the area to uses defined as being ‘low occupancy’. Sample results would be used to develop a work plan for removing PCB-contaminated soil above a certain threshold such that the ELUC and other restrictions or notices would not apply, as allowed by TSCA 40 CFR 761.61(a)(4)(v).

The DNR determined, in consultation with the Environmental Protection Agency (EPA), that as these actions are intended to only address the ELUC and other potential restrictions resulting from meeting TSCA cleanup standards, that you should be working directly with the EPA to obtain needed reviews or approvals. We recommend that you direct your request for a work plan review to:

Peter Ramanauskas  
RCRA Corrective Action Project Manager  
Regional PCB Coordinator  
USEPA Region 5  
77 W. Jackson Boulevard (LR-16J)  
Chicago, IL 60604  
(312) 886-7890  
Email: [ramanauskas.peter@epa.gov](mailto:ramanauskas.peter@epa.gov)

We appreciate your efforts to restore the environment at this site. If you have any questions regarding this letter, please contact me, the DNR project manager, at (414) 405-0764 or [paul.grittner@wisconsin.gov](mailto:paul.grittner@wisconsin.gov).

Sincerely,

Paul Grittner  
Hydrogeologist  
Remediation & Redevelopment Program
