Subject: Amoco Oil Terminal 02-16-000331
Date: Tuesday, December 5, 2023 3:34:00 PM

Layne,

As we discussed in our telephone conversation this morning, I am currently working on your technical assistance request for the Amoco Oil Terminal (BRRTS# 02-16-000331) site. The request made was for review of a site investigation report (SIR). The report submitted was an addendum to the 2017 SIR. Due to the complexity of the site and the amount of work performed since 2017, the DNR is requesting a comprehensive SIR that incorporates the addendum work into the 2017 SIR. The intent is to have a document that includes a summary of all work done at the site and a clear depiction of the current degree and extent of contamination. In our discussion this morning we agreed that 4 months is a reasonable time frame for report. The current review will be paused until receipt of the new SIR. The DNR will expect to receive the SIR by April 5, 2024.

If you have any comments or questions regarding this issue please feel free to contact me.
