RE: Agnos Ace Cleaners, BRRTS #02-41-000364

241 172800

Dear Tim,

I am writing to discuss the cost separation methodology for ineligible and eligible costs for the the Agnos Ace Cleaners site, BRRTS #02-41-00364.

We recommend a 0% methodology be applied at this site. The chlorinated issue appears limited to the area of HA-1, as there were no detects of chlorinated hydrocarbons found in any of the surrounding geoprobe borings in either the soil or groundwater samples. Thus, we believe that the chlorinated contamination has already been defined, leaving only petroleum contamination to be investigated.

Per your response, we will proceed with obtaining agent status and the required investigation.

If you have any further questions, please feel free to contact me at (608) 781-8879 to discuss.

Sincerely,

Ronald J. Anderson  
Senior Project Manager/Senior Hydrogeologist

Is there going to be follow-up with DNR PM/dry clean group. (i.e., are they OK with no follow-up)?
