Dear Brian,

The Board of Trustees has authorized your firm to proceed with the preparation of the scope of work plan related to the contamination problem behind the Thiensville DPW facility. They have also accepted your proposal to proceed with the work you anticipated to be necessary to follow through with the scope of work plan. You should, however, be aware that this authorization does not extend to a scope of work that deviates dramatically from the one you proposed.

For your information, I have secured a fifteen day extension of the DNR deadline for submitting the scope of work plan. Attached is my letter to John Feeney confirming that extension.

If you have any questions concerning this matter, please contact me.

Very truly yours,

Kristine M. Hinrichs
