Ms. Chronert,

Please find enclosed copies of the files for the clean up of these two spills. I regret that you did not receive copies of these when they were completed. Please review them so these sights can be closed.

If you have any further question please contact me at (913) 344-3055.

Sincerely,

INCIDENT SUMMARY

NOTIFICATION DATE: 03-29-04

TIME NOTIFIED: 1904

NOTIFIED BY: Milton Wall of Haz Mat One

INCIDENT LOCATION: Kewaunee Fabrications
520 North Main Street
Kewaunee, WI 54216

CONTACT: Gale Ullman

INCIDENT TYPE: Spill

SUBSTANCE: Diesel Fuel

SOURCE: Semi tractor

WASTE GENERATED: 52.95 tons of diesel fuel contaminated soil

INCIDENT NARRATIVE

On March 29th 2004 Onyx Special Services Emergency Dispatch was called by Travis Hillmer of Haz-Mat One regarding a diesel fuel spill. It was requested that Onyx Special Services, Inc. (Onyx) respond, clean up and dispose of the spilled product. The spill occurred in the parking lot of Kewaunee Fabrications in Kewaunee, WI. The semi involved released approximately 15 gallons of diesel fuel on the asphalt parking lot and grass surrounding the parking lot.

Upon arrival to the site, Onyx personnel established a safe work environment and determined the limits of contamination. The area was too large to effectively treated with hand tools. The site was staked off for identification purposes, contact made with Diggers Hotline, and an excavation was scheduled for April 5th, 2004. Absorbent Boom was placed to prevent the migration of the released diesel fuel.

On April 5th, 2004 Onyx established conducted a Site Safety Brief and established a safe work environment. Approximately 53 tons of diesel contaminated soil was excavated from the site, placed in dump trucks and disposed of at Hickory Meadows Landfill LLC. The excavation extended to a maximum depth of 18 inches. The area was back filled with sand and topsoil and covered with straw.

Soil samples were collected using WDNR approved methods. The soil samples were sent to US Filter in Rothschild, WI for laboratory analysis of diesel range organics. Analytical results showed that the site had been effectively remedied. This concludes Onyx Special Services activities in regards to this response.

All information presented in this report has been submitted with good intent and to the best of my knowledge.
