Subject: Resolution of Priority Cases
Importance: High

Lori:

There are several high priority cases in the West Central Region that cannot proceed until we hear from you. We need a response/decision from Commerce on the following cases:

1. **Village of Granton Municipal Water Supply** (Zawaislan, Hubing, and Kuhl bundled LUST sites)
-A decision is still pending on the lending bundle. The remedial action plans were put on hold, no monitoring of monitoring wells have been allowed, and the bidding process has delayed these cases for over two years.
2. **Countryside Coop, Mondovi**
-In response to 5000 gallons of gasoline on the water table, DNR and Commerce hydrogeologists met and prepared a tentative plan for allowing product recovery to commence without bidding. On September 5, you took the case to determine if the amount available for emergency response should be extended, and no action has occurred since.
3. **Colonial Standard**
-I am still waiting for you to get back to me to resolve the bid dispute on this case, which I forwarded to you on August 2.

This is to inform you that if we can't work out an acceptable resolution to these cases by **October 31**, then we need to elevate the decision to Bill Morrissey and Mark Giesfeldt. The delays in addressing these cases have become problematic and are exacerbating what I feel is an ineffective process. We need to move these forward in order to serve the needs of our customers, the environment and the citizens of the State of Wisconsin!
