We will take care of the revisions. I believe when this was sent out we were not using the updated standards.
Thanks,

Jason Powell

Just a few adjustments and it is good to go:

The project is paused for corrections. After corrections are made, resubmit updated closure request. I will route the updates to the closure committee for closure approval signatures (soil and gw GIS, no COs).

Tables and figures are using **old RCLs**.

- Update all tables and figures to reflect current RCLs.
- Update figures to reflect that no direct contact exceedences exist if using current standards.
- Update closure request to remove the CO for cap maintenance.
 - Section 5
 - Narrative sections that reference CO for Cap Maintenance
 - Any other applicable changes

I entered it into BOTW in May and completed my initial review on May 22. I am conducting final review with the anticipation of presenting it to the next closure committee meeting
