# Waste Registry Screening Worksheet Form 4400-220 (12/05) Page 1 of 4

Instructions: Information sources that can be used to fill out this worksheet include: BRRTS, SHWIMS, R&R files, WA files, regional geologic information resources, Waste Staff, County Solid Waste staff (if there is one for the county) and the EPA web site for CERCLIS. Other possible resources may include: city/town files, county files, aerial photos, readily available Sanborn Insurance maps and interviews with former employees or neighbors.

. Sampling Explanation & Other Work Recommended	n tra bé s
To document your decision for future project managers/staff, briefly explain the rationale for the overall site decision and sampling record if well sampling is recommended, please include the receptor information including well(s) location/address, owner's name, mailing add	nmendatio

B. If you believe additional work is needed or not needed (addressing leachate problems, exposed waste, inadequate cover, etc.) please add information to comment page, Section XIII.

#### XIII. Comments

IV. Legal Description of Site

Latitude: 43 degrees, 52 minutes, 17.0 seconds North Longitude: 91 degrees, 13 minutes, 54.5 seconds West

VII. Site Background Information

Historically:

Charles J. Ablan property located at 1001 2nd Avenue SW, Parcel No. 18-947-0 (1.240 acres) Harriet Karrib property located at 1005 2nd Avenue SW, Parcel No. 18-945-0 (2.250 acres)

#### Presently:

Centaur, LLC property located at 1001 2nd Avenue SW, Parcel No. 18-947-1 (0.346 acre) Evenson Investments, LLC property located at 1009 2nd Avenue SW, Pacel No. 18-947-2 (0.81 acre) KRM of La Crosse, LLC property located at 1025 2nd Avenue SW, Parcel No. 18-947-3 (2.448 acres)

Charles J. Ablan operated the salvage yard with partner Louis Karrib from 1952 until Louis's death in 1964. Charles J. Ablan owned the north half of the property and widow Harriet Karrib owned the south half of the property. Harriet leased the property to Charles to continue the salvage business until operations ceased in 1994.

Registerd Agent Charles J. Ablan died on October 2, 1998, and National Auto Wrecking Co., Inc. was dissolved on January 27, 2003.

#### VIII. Type of Site: Current and Historic

National Auto Wrecking Co., Inc. accepted waste automotive, and other, batteries and transformers for salvage. The company "cracked" batteries for the purpose of extracting lead cores and discarded the crushed batteries on the property as fill material. Transformers were cut open for the purpose of extracting the copper windings and magnetic cores and transformer oil was discarded on the property. The property also had a leaking underground storage tank on-site used to store diesel fuel.

The Federal Environmental Protection Agency (EPA) issued an Administrative Order by Consent (AOC) to the Estate of Charles J. Ablan and National Auto Wrecking Co., Inc. for the environmental investigation and cleanup of the salvage yard in the spring of 2000. The AOC identified work to be performed by the respondents, including preparing plans, providing site security, asbestos abatement, building demolition, metal recycling, decontamination, removal and disposal of abandoned containers and underground storage tanks, determine degree and extent of contamination, and removal of contaminated soil. The Estate of Charles J. Ablan was able to conduct some additional environmental site investigation work and construct a new chain-link fence around the site at a cost of approximately \$170,000.00 before running out of funds. Thereafter, the EPA conducted cleanup of the property under the Superfund Program at a cost of approximately \$800,000.00, including demolition of two buildings; removal and disposal of a 1,000-gallon underground storage tank (UST) and two 500-gallon abovegound storage tanks (ASTs); disposal of fourteen (14) 55-gallon drums of waste gasoline and two (2) 55-gallon drums of waste diesel fuel; removal to the La Crosse County Landfill of 10,869.62 tons of treated contaminated soil, 2,825.66 tons of untreated contaminated soil, and 437.29 tons of contaminated debris. The WDNR contributed approximately \$6,000.00 out of the Environmental Fund to pursue groundwater investigation and enforcement meetings. Cleanup of the property was completed in the fall of 2001. Thereafter, the WDNR contracted with Cedar Corporation to conduct a groundwater investigation and spent approximately \$36,000.00 from the Environmental Fund. The site was closed by the R&R Program on May 11, 2004, and listed on the WDNR's GIS Registry of Closed Remediation Sites for residual soil contamination remaining on-site.

#### X. Site Visit Observations and Receptor Information

A site visit was conducted on April 23, 2007. The former National Auto Wrecking Co., Inc..site has been subdivided into four (4) lots of which three (3) are presently developed and one (1) is vacant. The three developed parcels are occupied by Scheider Heating & Air Conditioning, Builders Flooring, and Archer Lion, Inc. (windows, siding & exterior treatments). The properties are within the City of Onalaska and served by municipal services. The properties are located approximately 300 feet east of backwaters of the Black River.

#### XII. Sampling Explanation & Other Work Recommended

Based on the EPA removals action, subsequent site investigation activities, closure by the WDNR, and presence of municipal services, no sampling is recommended.
