Re: Non-Hazardous Waste Determination for Off-Property Soil/Sediment  
Former Koppers Inc. Facility, Superior, WI BRRTS # 02-16-000484

Dear Ms. Patarcity:

The Department has had an opportunity to review your letter dated November 1, 2016 providing additional information relating the Beazer's non-hazardous waste determination for the soil and sediment associated with the off-property portion of the Koppers site in Superior, WI. Your letter was in response to a July 12, 2016 request for additional information relating to the non-hazardous waste determination at other sites after reviewing your determination on July 7, 2016.

In your response you have provided the Department with a number of sites where Beazer has obtained approval for the non-hazardous waste determination. Since receiving your letter we have had the opportunity to review your determination with staff in the Bureau of Waste and Materials Management. They have pointed out Hazardous Waste Annual Reports documenting the generation of hazardous wastes have been provided to the Department for the period 1989 thru 2014, please see the attached Hazardous Waste Annual Report Records for Selected Generator dated July 11, 2016. Koppers Inc. also provided the Department with Hazardous Wastes Manifests which are captured in the attached report Hazardous Waste Manifest Records which documented the generation of waste between 1983 and 2016. Your July 7<sup>th</sup> letter stated: "The USEPA has taken the position that if determination to this effect is lacking, the lead agency may assume that the waste is not a listed waste". The information generated in the two reports would indicate that hazardous waste have been generated that may have impacted off-property soil and sediment.

While the Department does not approve or reject your determination there appears to be information available that should be considered and may impact the finding. Therefore the Department requests that you evaluate the attached information to ensure that your determination is consistent with available information. Please feel free to contact me at (608) 266-7278 if you have any questions.

Sincerely,

Judy Fassbender  
Policy & Technical Resources Section Chief  
Bureau of Remediation and Redevelopment
