Re: Non-Hazardous Waste Determination for Off-Property Soil/Sediment
Former Koppers Inc. Facility – Superior, WI
BRRTS Case No. 02-16-000484

Dear Ms. Patarcity,

DNR has completed our review and evaluation of the hazardous waste determination submitted by Dave Bessingpas on behalf of Beazer on July 7, 2016, the supplemental information provided in an email from you on November 1, 2016, and information in your letter dated February 7, 2017. In addition, DNR conferred with our respective counterparts at EPA regarding similar or comparable waste determinations. Based on the information supplied to DNR by Beazer, DNR does not contest Beazer's waste determination for off-property soil/sediment managed as part of a future corrective action. Beazer determined this soil/sediment is not a listed hazardous waste. Whether the soil/sediment is classified as a characteristic hazardous waste will need to be determined prior to disposal.

The DNR looks forward to working with Beazer to complete a successful remedy for Crawford Creek.

Sincerely,

Judy Fassbender
Section Chief
