Dear Mr. Sager:

On behalf of Beazer East, Inc. (Beazer), Arcadis is submitting the Bimonthly Progress Report for the period of September and October 2021 for the Former Koppers Inc. Facility in Superior, Wisconsin. If you have any comments or questions concerning this progress report, please contact Ms. Jane Patarcity of Beazer at 412.208.8813 or me at 218.208.3427.

Sincerely,
Arcadis U.S., Inc.

David Bessingpas
Project Manager

Jane Patarcity, Beazer

A. Current Activities

On September 12, 2011, Beazer submitted a Construction Documentation Report for the completed on-property corrective measures. WDNR issued a conditional approval of the report on October 21, 2011, but withheld final approval pending Beazer's submittal of an acceptable continuing obligations/GIS Registry package. A Notification of Continuing Obligations and Residual Contamination was submitted to the current property owner on June 16, 2014. A GIS Registry package was submitted to WDNR on August 5, 2015. Final WDNR approval of the on-property corrective measures is pending.

On May 5, 2021, WDNR issued a letter to Beazer regarding close-out of the hazardous waste compliance assessment. During this reporting period, Beazer continued preparing a response to WDNR's May 5 letter, along with a Long-Term Care License Renewal Application.

Beazer and USEPA continued to work on the Great Lakes Legacy Act (GLLA) Focused Feasibility Study (FFS) project for the off-property portion of the Site during this reporting period. GLLA project-related activities conducted during this reporting period included the following:

- Beazer (and their consultants, Arcadis and Anchor QEA), USEPA (and their contractor, Jacobs), and WDNR participated in a project team conference call on October 29, 2021. During this call, various figures and other supporting information were presented and discussed, in advance of a November 10, 2021 working session. The figures and supporting information were subsequently posted to the project SharePoint site.

B. Summary of Findings

See Section I below.

C. Schedule

No schedule updates were submitted during this reporting period.

D. Progress

Refer to Sections A and C of this report.

E. Problems Encountered

No problems were encountered this reporting period.

F. Corrective Action

No corrective actions were required this reporting period.

G. Project Personnel

No project personnel changes occurred during this reporting period.

H. Response to Agency Comments on RFI Reports

No responses to WDNR comments were submitted during this reporting period.

I. Reports Submitted to the Agency

No reports were submitted to the WDNR during this reporting period.

Refer to Section A above for a list of submittals related to the GLLA FFS project.

J. Projected Work for the next Reporting Period

Beazer and USEPA will continue to work on the GLLA FFS project, including participating in project team calls and continuing FFS report preparation tasks.

Beazer will complete preparation of and submit a response to WDNR's May 5 hazardous waste compliance assessment letter, along with a Long-Term Care License Renewal Application.
