SEND REMAINDER OF FORM INTACT TO PERSON ADDRESSED.

TO: Kewaunee Marsh file

FROM: J. Reuber - LMO

SUBJECT-MESSAGE

I spoke with Kathy Patzold - wildlife. She received lab results for herring gull. Liver was 0.2 ug/g Arsenic and G.I tract contents was 0.7 ug/g. The liver ^{0.02} was comparable with background - baseline study results. The G.I tract was elevated, but well below mortality causing levels.
