Subject: RE: Vapor Port and Well abandonment.

Barbara – The investigation on your property is related to the Former Susie’s Restaurant Site (BRRS #: 02-36-000516). If the Susie’s Restaurant Site were to close you might receive notification at that time of residual contamination on your property, however at this time we do not have any samples above a standard from the work performed on your property this year. The two letters you received serve as the notification of the results from your property, however no case was open on your property and as a result no closure is required. The data from the sampling will be included with the open Susie’s Restaurant Site.

Thank you,
Sarah

Thank You for the update. When will we get paperwork notifying us that the investigation has been closed on our property?

Good morning Barbara,

The vapor ports in the sub-slab of your buildings, and the two groundwater monitoring wells will be abandoned tomorrow or Friday this week.

Please let me know if you have any additional questions.

Thank you for your time.

Good Morning Kathy,

I know you typically are not working on Friday. That being said the consultant will be abandoning the vapor ports tomorrow or Friday this week. I apologize for the short notice hopefully this will not be an issue.

Please let me know if you have any questions.

Thank you for your time.

Subject: Vapor Port Abandonment

Good Morning Sue and Salvador:

Thank you for the time looking at the basement in the restaurant yesterday. I wanted to let you know that Brian the consultant who has been there to collect the vapor samples plans to come to the restaurant tomorrow or Friday to abandon the vapor port in your basement and seal the hole. The vapor port in the basement of the residential property will remain in place for a third and final sample to be collected during the heating season this winter after which the vapor pin will be abandoned.

Please let me know if you have any questions. I will keep you updated on the progress to get the Vapor Mitigation System installed this month.

Thank you,

Sarah
