

Wisconsin Department of Natural Resources
ACCESS PERMISSION AND VAPOR MITIGATION AGREEMENT

I, Salvador Velasques, hereby give permission to the Wisconsin Department of Natural Resources (DNR) and its employees, duly authorized representatives, agents and contractors, to enter upon and have access at reasonable times to the property and business located at 2604 Custer Street, Manitowoc, WI, 54220, and that is owned by me, Salvador Velasques.

The property is located at 2604 Custer Street, parcel number 052-000-367-040.00, Manitowoc County, Wisconsin. The access permission is for the following purposes: that the DNR may mitigate vapor intrusion at the business due to the presence of Trichloroethene. This permission allows the DNR to:

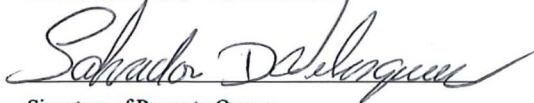

- (1) *Inspect the business and determine which (if any) diagnostic tests are necessary in the business prior to installation of a sub-slab depressurization system (SSDS);*
- (2) *If necessary, conduct a communication test beneath the foundation slab to design a SSDS appropriate for the structure;*
- (3) *Inspect the sump and discharge to determine what actions are necessary to seal the sump for installation of a SSDS;*
- (4) *Install a SSDS in the business, including sealing of the sump and associated plumbing recommendations;*
- (5) *Conduct communication testing beneath the foundation slab after the SSDS is installed to determine if a pressure differential exists and to add additional suction pits, do additional foundation sealing, etc., if necessary;*
- (6) *If needed, to collect indoor air sample(s) on each level of the business following installation of the SSDS;*
- (7) *Inspect the system once every two (2) years or as otherwise recommended based on current industry standards; and*
- (8) *Maintain and monitor the individual components of the SSDS with the exception of providing electricity necessary to operate the fan.*

Once the installation is complete, the SSDS will be owned by the property owner. The contractor will provide a basic warranty on labor and materials to the homeowner and the DNR. The property owner agrees not to damage or interfere with the operation of the SSDS and any work performed that was completed as part of the SSDS installation, including sealing of the sump. The property owner agrees to provide the electricity necessary to operate the fan for the SSDS.

The property owner understands that after the system is installed, DNR will maintain and monitor the SSDS and in order for the system to be effective, it must be operated continuously and as instructed by the contractor.

The property owner understands and agrees that DNR is not liable or responsible for providing the electricity necessary to operate the fan after the SSDS is installed.
